Dixie Looks Abroad Joseph A. Fry, 2002-01-01 As America's most self-conscious section the South has exercised an important and often decisive influence on U.S. foreign relations but the extent of this influence has been largely unexplored by historians In this groundbreaking study Joseph A. Fry provides a comprehensive overview of the South's role in U.S. international involvement from 1789 to 1973 revealing the enormous impact of southern pressure on broader national interests In a gracefully written and engaging narrative Fry chronicles the South's numerous foreign policy opinions over time including its opposition to closer relations with Great Britain and war with France in the 1790s its leadership in the War of 1812 its flawed diplomatic attempts during the years of the Confederacy and its fifty year protest against the increasingly assertive Republican dominated political agenda following the Civil War With the election of Woodrow Wilson Fry shows the South reversed its tendency toward isolationism and consistently supported Wilson's activist foreign policies The South sustained this interventionist mind set into the 1970s ardently supporting cold war containment policy Fry is careful to note that southerners seldom presented a completely united front on foreign affairs Yet even while disagreeing among themselves he argues they consistently viewed the world through a distinctly southern lens and acted on a variety of perceived common interests including a dedication to honor and patriotism a determination to protect slavery a proclivity for personal violence a commitment to partisan politics a concern for economics and a preoccupation with race Though the South's foreign policy

opinions varied widely through the years Fry's extraordinary work affirms that Dixie has always held considerable clout on the world stage

Debtor Diplomacy Jay Sexton, 2005-07-21 The United States was a debtor nation in the mid nineteenth century with half of its national debt held overseas Lacking the resources to develop the nation and to fund the wars necessary to expand and then preserve it the United States looked across the Atlantic for investment capital The need to obtain foreign capital greatly influenced American foreign policy principally relations with Britain The intersection of finance and diplomacy was particularly evident during the Civil War when both the North and South integrated attempts to procure loans from European banks into their larger international strategies Furthermore the financial needs of the United States and the Confederacy imparted significant political power to an elite group of London based financiers who became intimately involved in American foreign relations during this period This study explores and assesses how the United States' need for capital influenced its foreign relations in the tumultuous years wedged between the two great financial crises of the nineteenth century 1837 to 1873 Drawing on the unused archives of London banks and the papers of statesmen on both sides of the Atlantic this work illuminates our understanding of mid nineteenth century American foreign relations by highlighting how financial considerations influenced the formation of foreign policy and functioned as a peace factor in Anglo American relations This study also analyses a crucial but ignored dimension of the Civil War the efforts of both the North and the South to attract the support of European financiers Though foreign contributions to each side failed to match the hopes of Union and Confederate leaders the financial diplomacy of the Civil War shaped the larger foreign policy strategies of both sides and contributed to both the preservation of British neutrality and the ultimate defeat of the Confederacy

Vigilance Is Not Enough Mark M. Lowenthal, 2025-05-06 A broad and deep survey of American intelligence from before the Revolution to the present Every nation has an intelligence apparatus some means by which its top officials acquire needed information on sensitive issues But each nation does it differently influenced by its history its geographical conditions and its political traditions In this book Mark M Lowenthal examines the development of U S intelligence to explain how and why the United States went from having no intelligence service to speak of to being the world

s predominant intelligence power almost overnight and he discusses the difficult choices involved in maintaining that dominance in a liberal democracy Lowenthal describes how the lack of a tradition of spycraft both hindered and helped American efforts to develop intelligence services during and after the Second World War He points to the political pragmatism leading to difficult choices with which most intelligence directors operated the constant tension between security and civil liberties in a constitutional democracy the tension between the need for secrecy and the accountability required for democratic governance and the way the growing importance of technology changed both the methods and the objectives of intelligence gathering Far more than simply an episodic history this book offers an analysis of why American intelligence developed as it did and what it has meant for the nation s and the world s politics Beating Plowshares Into Swords Paul A. C. Koistinen,1996 Koistinen describes how an undeveloped preindustrial economy forced Americans to fight defensive wars of attrition like the Revolution and the War of 1812 By the time of the Mexican War however a gradually maturing economy allowed the United States to use a much more offensive minded strategy to achieve its goals The book concludes with an exhaustive examination of the Civil War a conflict that both anticipated and differed from the total wars of the industrialized era Koistinen demonstrates that the North relied upon its enormous economic might to overwhelm the Confederacy through a strategy of annihilation while the South bungled its own strategy of attrition by failing to mobilize effectively a much less developed economy **An Introduction to the Papers of the New York Prize Court, 1861-1865** Madeline Russell Robinton,1941 **Columbia University Studies in the Social Sciences** ,1945 *Encyclopedia of the Confederacy* ,1993 V 1 Adam Curr V 2 Dahl Loma V 3 Long Shil V 4 Shin Zall **Guide to Reprints** Albert James Diaz,2000 Maritime and Naval History ,1972 Minutes of the Annual Convention United Daughters of the Confederacy,1940 Minutes of the ...
