In recent years the Sarbanes Oxley Act has received international attention unlike few other laws The rules presented in this act take influence on business practice and dominate the ongoing discussion on business constitution in the USA as well as in Europe Christiane Strohm's dissertation investigates the effects of the Sarbanes Oxley Act and the revised 8 EU Directive as a response toward the US law on auditing This study is innovative for several reasons Combining an auditor independence risk model Mock et al 2005 with considerations on task complexity Bonner 1994 1995 the author develops an experimental approach that can be put to future use in research on regulation In the following the American and European regulations are investigated in three separate experiments that are conducted with

participants of international background With this the author provides to my knowledge the first empirical comparative analysis of the Sarbanes Oxley Act and the revised 8 EU Directive As both statutes provide representative examples for rules based Sarbanes Oxley Act and for principles oriented 8 EU directive regulation this work deserves recognition from beyond the limited scientific community of those interested in auditing The experimental design and the results generated by this study are of high significance for the general discussion on the advantages of either rules based or principles oriented regulation that characterizes the current controversial debate on corporate governance
