The Aztec Templo Mayor Antonio Serrato-Combe, 2001 The Templo Mayor was a concrete manifestation of this unique system of beliefs Antonio Serrato Combe's carefully researched graphic treatments of these architectural spaces are at once both novel and stunning Using computer generated three dimensional color imagery he presents a series of architectural topics ranging from site planning principles to building details *Cosmopolitanism in Mexican Visual Culture* María Fernández, 2014-01-06 Since the colonial era Mexican art has emerged from an ongoing process of negotiation between the local and the global which frequently involves invention synthesis and transformation of diverse discursive and artistic traditions In this pathfinding book María Fernández uses the concept of cosmopolitanism to explore this important aspect of Mexican art in which visual culture and power relations unite the local and the global the national and the international the universal and the particular She argues that in Mexico as in other colonized regions colonization constructed power dynamics and forms of violence that persisted in the independent nation state Accordingly Fernández presents not only the visual qualities of objects but also the discourses ideas desires and practices that are fundamental to the very existence of visual objects Fernández organizes episodes in the history of Mexican art and architecture ranging from the seventeenth century to the end of the twentieth century around the consistent but unacknowledged historical theme of cosmopolitanism allowing readers to discern relationships among various historical periods and works that are new and yet simultaneously dependent on their predecessors She uses case studies of art and architecture produced in response to government commissions to demonstrate that established visual forms and meanings in Mexican art reflect and inform desires expectations memories and ways of being in the world in short that visual culture and cosmopolitanism are fundamental to processes of subjectification and identity Modern Mexico James D. Christie, Jelena Bogdanovic, Eulogio Guzmán, 2016-08-08 *Political Landscapes of Capital Cities* investigates the processes of transformation of the natural landscape into the culturally constructed and ideologically defined political environments of capital cities. In this spatially inclusive socially dynamic interpretation an interdisciplinary group of authors including archaeologists, anthropologists, and art historians uses the methodology put forth in Adam T. Smith's *The Political Landscape: Constellations of Authority in Early Complex Polities* to expose the intimate associations between human-made environments and the natural landscape that accommodate the sociopolitical needs of governmental authority. *Political Landscapes of Capital Cities* blends the historical political and cultural narratives of capital cities such as Bangkok, Cusco, Rome, and Tehran with a careful visual analysis hinging on the methodological tools of not only architectural and urban design but also cultural, historiographical, and anthropological studies. The collection provides further ways to conceive of how processes of urbanization, monumentalization, ritualization, naturalization, and unification affected capitals differently without losing grasp of local distinctive architectural and spatial features. The essays also articulate the many complex political and ideological agendas of a diverse set of sovereign entities that planned, constructed, displayed, and performed their societal ideals in the spaces of their capitals, ultimately confirming that political authority is profoundly spatial. [The Aztecs of Central Mexico](#)

Frances F. Berdan, Frances Berdan, 2005. This case study is about the Aztecs of central Mexico, a people who dominated a vast area of what is now Mexico when the Spanish conquistadors arrived in AD 1519 but who had humble beginnings as despised nomads. The story of the confrontation and the defeat of the Aztecs by the small force of Spaniards led by Hernán Cortés is told in the last chapter. The larger part of this book is devoted to an ethnographic reconstruction of Aztec culture as it flourished in the period immediately preceding the conquest.

In *Unseen Art* Claudia Brittenham unravels one of the most puzzling phenomena in Mesoamerican art history: why many of the objects that we view in museums today were once so difficult to see. She examines the importance that ancient Mesoamerican people assigned to the process of making and enlivening the things we now call art, as well as Mesoamerican understandings of sight as an especially godlike and elite power in order to trace a gradual evolution in the uses of secrecy and concealment from a communal practice that fostered social memory to a tool of imperial power. Addressing some of the most charismatic of all Mesoamerican sculptures such as Olmec buried offerings, Maya lintels, and carvings on the undersides of Aztec sculptures, Brittenham shows that the creation of unseen art has important implications.
