The Goals of Competition Law Daniel Zimmer, 2012 What are the normative foundations of competition law That is the question at the heart of this book Leading scholars consider whether this branch of law serves just one or more than one goal and if it serves to protect unfettered competition as such how this goal relates to other objectives such as the promotion of economic welfare The book brings together contributions on the relevance of different welfare standards on the concept of freedom to compete and on distributional fairness as a goal of competition law Moreover it discusses the relationship to other legal goals such as mar

Encyclopedia of Law and Economics Alain Marciano, Giovanni Battista Ramello, 2026-01-29 This Encyclopedia offers a concise introduction to law and economics a thriving and continuously evolving field While other valuable resources already provide numerous essays on specific topics this encyclopedia is original differing from and complementing existing encyclopedias and companions in four respects First to cover as many aspects and dimensions of law and economics as possible it includes a large number of relatively short chapters Second many of these chapters explore the boundaries between law and economics and related fields such as public choice institutional economics transaction cost economics and industrial economics Third the encyclopedia allocates space for historical and methodological chapters focusing on the founders of the field and on important scholars who directly or indirectly contributed to shaping law and economics as it is today This new edition aims to expand these distinctive features Its goal is to cover even more areas within law and economics particularly by addressing issues raised by big data and new technologies to deepen the interdisciplinary dimension of the field and to include additional historical and methodological chapters The second edition includes 150 additional entries compared to the first edition with most of the existing chapters updated This results in a broader and more up to date coverage of law and

economics The Boundaries of EC Competition Law Okeoghene Odudu, 2006 This monograph addresses two problems surrounding the interpretation and application of Article 81 of the EC Treaty what is competition and how does Article 81 ensure that competition is protected After over 40 years of application and a period of modernisation decentralisation and reflection it is possible to understand Article 81 and what it seeks to achieve The monograph s aim is to reveal the intellectual order and rational structure underlying the law so as to enable the reader to understand Article 81 in a clear and rigorous manner This is done by breaking Article 81 down into its constituent elements and examining the function that each element serves Arguing that jurisdiction rests on a public private distinction both the substantive and the justificatory rules are cast to generate obligations appropriate for private actors to perform Actors and activities falling within the scope of Article 81 are subject to the substantive element prohibiting contrived reductions in output Since output reduction can co exist with cost reduction innovation and that these latter features are desirable cost reduction and innovation operate to justify infringement of the substantive obligation Thus this monograph argues that output cost and innovation are the only legitimate issues in an Article 81 analysis It is in this sense that the monograph is concerned with the boundaries of Article 81 EC Research Handbook on Behavioral Law and Economics Joshua C. Teitelbaum, Kathryn Zeiler, 2018-03-30 The field of behavioral economics has contributed greatly to our understanding of human decision making by refining neoclassical assumptions and developing models that account for psychological cognitive and emotional forces The field s insights have important implications for law This Research Handbook offers a variety of perspectives from renowned experts on a wide ranging set of topics including punishment finance tort law happiness and the application of experimental literatures to law It also includes analyses of conceptual foundations cautions limitations and proposals for ways forward **Australian Cartel Regulation** Caron Beaton-Wells, Brent Fisse, 2011-04-25 Cartel regulation is a prime element of competition policy and an essential means of minimising the adverse effects of cartel activity on economic welfare However effective cartel regulation poses distinct challenges for governments competition authorities and commentators across the globe In Australian Cartel Regulation leading competition law experts Caron Beaton Wells and Brent Fisse reflect on developments in anti cartel law in Australia over the last 30 years They provide a comprehensive account of the current law on cartels as well as discussing key issues that may arise in the future This definitive volume not only identifies the practical and theoretical issues but also recommends workable solutions and does so with the benefit of comparative analysis of the anti cartel laws of major overseas jurisdictions Many of the issues identified and discussed in Australian Cartel Regulation are common to any scheme designed to regulate cartel conduct *Parental Liability in EU Competition Law* Peter Whelan, 2023 Parental Liability in EU Competition Law assesses the shortcomings of the EU doctrine of parental antitrust liability and proposes a new framework for imposing liability that is theoretically robust effective in practice fair in substance and legally sound **Baseball Economics and Public Policy** Jesse William Markham, Paul V.
