legal regimes have existed at the margins for over a century. In recent years a critical mass of scholarship has emerged and this book celebrates its coming of age. Its objective is to facilitate an interdisciplinary conversation by providing sure-footed guidance across contested terrain as well as enabling future avenues of enquiry to emerge. The distinctive feature of this volume is that it reflects a multi-disciplinary conversation between legal scholars, policy makers, legal practitioners, historians, geographers, sociologists, economists, and anthropologists. Experienced contributors from across these domains have thematically explored 1 the history and conceptual underpinnings of the GI as a legal category 2 the effectiveness of international protection regimes 3 the practical operation of domestic protection systems and 4 long unresolved as well as emerging critical issues. Specific topics include a detailed interrogation of the history and functions of terroir, the present state as well as future potential of international GI protection including the Lisbon Agreement 2015, conflicts between trade marks and GIs, the potential for GIs to contribute to rural or territorial development as well as sustain traditional or Indigenous knowledge and the vexed question of generic use. This book is therefore intended for all those with an interest in GIs across a range of disciplinary backgrounds. Students, scholars, policy makers, and practitioners will find this Handbook to be an invaluable resource.
