**Concise Readings in Philosophy** William H. Halverson, 1981-01-01 **Concise readings in philosophy** William H. Halverson (ed), 1981 *First Philosophy: Concise - Second Edition* Andrew Bailey, 2012-01-30 Andrew Bailey's highly regarded introductory anthology has been revised and updated in this new concise edition. Mindful of the intrinsic difficulty of the material, the editors provide comprehensive introductions both to each topic and to each individual selection. By presenting a detailed discussion of the historical and intellectual background to each piece, the editors enable readers to approach the material without unnecessary barriers to understanding. Helpful explanatory footnotes are provided throughout, and new sections on philosophical puzzles and paradoxes and philosophical terminology have been added. **Reading Philosophy** Samuel Guttenplan, Jennifer Hornsby, Christopher Janaway, John Schwenkler, 2021-01-12 A key introductory philosophy textbook making use of an innovative interactive technique for reading philosophical texts. *Reading Philosophy: Selected Texts with a Method for Beginners* Second Edition provides a unique approach to reading philosophy, requiring students to engage with material as they read. It contains carefully selected texts, commentaries on those texts, and questions for the reader to think about as they read. It serves as starting points for both classroom discussion and independent study. The texts cover a wide range of topics drawn from diverse areas of philosophical investigation, ranging over ethics, metaphysics, epistemology, philosophy of mind, aesthetics, and political philosophy. This edition has been updated and expanded. New chapters discuss the moral significance of friendship and love, the subjective nature of consciousness, and the ways that science might explore conscious experience. And there are new texts and commentary in chapters on doubt, self, and moral dilemmas. Guides readers through the experience of active, engaged philosophical reading. Presents significant texts contextualized for newcomers to philosophy. Includes writings by philosophers from antiquity to the late 20th century. Contains commentary that provides the context and background necessary for discussion and argument. Prompts readers to think through specific questions and to reach their own conclusions. This book is an ideal resource for beginning students in philosophy, as well as for anyone wishing to engage with the subject on their own. **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 1990 List of members in v 1 *First Philosophy, concise edition* Andrew Bailey, 2006-03-14 This concise edition of the acclaimed introductory anthology *First Philosophy* brings together thirty readings on six topics central to philosophy. Mindful of the intrinsic difficulty of much of the material, the editor has provided comprehensive introductions both to the six topics and to each individual selection. By providing a detailed discussion of the historical and intellectual background to each piece, he aims to enable readers to approach the material without unnecessary barriers to understanding. The topics, from "Does God exist?" to "Do we have free will?" and "What is justice?" have been chosen with a view both to their philosophical importance and to their interest to the first-year student. In an introductory chapter, the editor provides a brief introduction to the nature of philosophical enquiry, to the nature of

argument and to the process of reading and writing within the academic discipline of philosophy **Reason and Responsibility** Joel Feinberg, 2016 **Contemporary Authors New Revision Series**, 2001-08 In response to the escalating need for up to date information on writers Contemporary Authors New Revision Series brings researchers the most recent data on the world's most popular authors These exciting and unique author profiles are essential to your holdings because sketches are entirely revised and up to date and completely replace the original Contemporary Authors entries For your convenience a soft cover cumulative index is sent biannually While Gale strives to replicate print content some content may not be available due to rights restrictions Call your Sales Rep for details **Philosophy: The Classics** Nigel Warburton, 2014-02-03 Now in its fourth edition Philosophy The Classics is a brisk and invigorating tour through the great books of western philosophy In his exemplary clear style Nigel Warburton introduces and assesses thirty two philosophical classics from Plato's Republic to Rawls A Theory of Justice The fourth edition includes new material on Montaigne Essays Thomas Paine Rights of Man R G Collingwood The Principles of Art Karl Popper The Open Society and Its Enemies Thomas Kuhn The Structure of Scientific Revolutions With a glossary and suggestions for further reading at the end of each chapter this is an ideal starting point for anyone interested in philosophy **Recording for the Blind & Dyslexic, ...
