Frontiers in Sciences, Engineering and the Arts Sunny N. E. Omorodion, 2017-04-27 Introduction to New Classifications of Polymeric Systems and New Concepts in Chemistry is the first volume of New Frontiers in Sciences Engineering and the Arts It is the first because of the importance of polymers in our lives and world With life steroids DNAs RNAs enzymes most of the food we eat and more are polymeric in character Without the polymer industry the largest industry in the whole world electrical and electronic industries Automobiles industries kitchen and household industries packaging industries oil and gas industries sound and current industries and more too countless to list cannot exist both in our physical and natural world a complex world The greatest subject area in chemistry is polymer chemistry for without it one would not have been able to see what the atom is It was only in recent years that some great scientists began to see that the electron does not exist outside the nucleus of an atom but probably inside the nucleus Indeed where they exist is still unknown to them What indeed are outside the nucleus are what some great scientists sometimes call radicals What these radicals are have remained unknown to humanity For example how can radicals add during free radical or radical polymerizations when they have not been identified just like the ions and charges have with for example their males and females One was able to ask this very deep question based on ones background in polymer chemistry at secondary bachelors masters and PhD levels Otherwise others can Finding solutions to it led to the New Frontiers using universal data abundantly available With this newly added definition for an atom one discovered that what all scientists engineers medical doctors and experts in all disciplines have been doing have all been based on the use of universal data 95 percent of which have wrong interpretations a complete world of illusions Is it not shocking to note that all chemists whether polymeric or not do not know what a monomer or compound is or how chemical and polymeric reactions take place Is it not shocking to note that the electrical and electronic engineers do not know how current and sound flows in some metals and liquids and in space These and so much more are the origins of the New Frontiers beginning with this first volume wherein new concepts seen in the first book *The Beginning of a New Dawn for Humanity* emerged from *Competition Science Vision*, 2000-01 *Competition Science Vision* monthly magazine is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India Well qualified professionals of Physics Chemistry Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to the point study material for aspiring candidates The magazine covers General Knowledge Science and Technology news Interviews of toppers of examinations study material of Physics Chemistry Zoology and Botany with model papers reasoning test questions facts quiz contest general awareness and mental ability test in every monthly issue [Some Monomers, Plastics and Synthetic Elastomers, and Acrolein](#) International Agency for Research on Cancer, 1979 Evaluates the carcinogenic risk to humans posed by some monomers plastics and synthetic elastomers and Acrolein [Chemical Abstracts](#), 1915 [Chemistry in Action](#) Nina Morgan, 1995 Explanation of the fundamentals of chemistry including the chemical elements organic chemistry and
