Encyclopedia provides easily accessible brief and understandable information on the topics that you are most likely to have  
questions about We have carefully digested the manuals books magazine articles and other information sources for the  
Macintosh These combined with our own experience in using the Macintosh and other personal computers have been  
integrated into an alphabetical sequence of short entries in the style of an encyclopedia The goal is to provide concise useful  
and easy to understand information on a particular topic that is quickly accessible when you need it Much of the information  
in the entries is not contained in the manuals provided with the Macintosh and various software products For example notice  
the discussion under WIDTH of the deferred nature of this command when used with a device name the discussion of the  
colon in Multiplan for ranges or Saving Problems With These topics are omitted or inadequately covered in the standard  
manuals The Macintosh is the first truly visual computer In keeping with the highly visual nature of using the Macintosh we  
have provided over 100 illustrations Each shows exactly what you will see on the screen when exploring topics discussed in  
the text The Macintosh Encyclopedia opens with a visual guide to icons and remains highly visual in orientation throughout
