**Development of Crash Imminent Test Scenarios for Integrated Vehicle-Based Safety Systems (IVBSS)** John D. Smith, Wassim Najm, National Highway Traffic Safety Administration, 2007 This report identifies crash imminent test scenarios based on common pre crash scenarios for integrated vehicle based safety systems that alert the driver of a light vehicle or a heavy truck to an impending rear end lane change or run off road crash Pre crash scenarios describe vehicle movements and critical events immediately prior to the crash The General Estimates System GES crash database was queried to distinguish common pre crash scenarios for light vehicles 2003 GES and heavy trucks 2000 2003 GES in terms of their frequency of occurrence Analysis of two vehicle rear end crashes revealed four dominant scenarios that accounted for 97 percent of light vehicle crashes and 95 percent of heavy truck crashes in which the subject vehicle was striking Four scenarios were also identified from an analysis of two vehicle lane change crashes comprising 65 percent of light vehicle crashes and 76 percent of heavy truck crashes in which the subject vehicle was encroaching onto another vehicle in adjacent lanes There were five single vehicle run off road scenarios representing 63 percent of light vehicle crashes and 83 percent of heavy truck crashes excluding crashes caused by vehicle failure or evasive maneuver An additional set of scenarios is proposed to address multiple threats from near simultaneous critical events This report also provides a statistical description of individual scenarios in terms of their environmental factors roadway geometry and speed conditions **Report**, 1982

ourselves and in the twentieth and twenty first century moving images have become the dominant form of this communication Bombarded by images we inhabit a media intensive world in which every aspect of life is pervaded by visual signs In these circumstances it becomes increasingly significant to engage with the politics of representation Through this vital process we can acknowledge that all cultural forms whether in high art or the mass media are in the broadest sense political We can also appreciate that it is a complex agenda of interests that shapes specific ideological meanings Fulsomely equipped we can apply this essential tool to the exciting task of decoding the political social and cultural meanings articulated through the making promotion and consumption of film This book aims to offer an arena for the analysis of these representations Representations cannot depict the truth TM and the essays in this book do not claim to search for the truth TM We ask whose truth TM is being represented how is it represented and why is it represented like that We also ask how do representations tell us something about the culture within which they are created Yet the essays in this volume are not stuck TM in the representational concerns of the past and try instead to uncover the power of cinema to shock and surprise whether that be through visceral impact subversive content experiments with identity or the exploration of the taboo Representation as defined by the eleven essays in this book is a fluid and dynamic approach to the study of film The study of film to which this book contributes some unique case studies is as popular as ever and has withstood growing challenge from the new media such as CG Animations the internet and computer console and online gaming This is because the pleasure of film is still the most humanistic and because the sophistication of the representations offered by cinematic expression remain ever more complex and pleasurable to decipher This book can therefore be read by any student academic writer or filmmaker hooked on these delights Modeling Intersection Crash Counts and Traffic Volume Hans C.
