Enlightenment writers and artists grounded humanity in the enactment of capacities reason speech educability that distinguish humans from other creatures generating a performative model of humanity capacious enough to accommodate broader claims to human rights In addressing genres typically excluded from canonical literary histories Fiction Without Humanity offers an alternative account of the rise of the novel showing how these early experiments with nonhuman perspectives helped generate novelistic techniques for the representation of consciousness By placing the novel in a genealogy that embraces paintings riddles scientific plates and fables Festa shows realism to issue less from mimetic exactitude than from the tailoring of the represented world to a distinctively human point of view
