metaphysics he admired were the prototype the 19th century ur form of the modern shopping mall Benjamin s dialectics of seeing demonstrate how to read these consumer dream houses and so many other material objects of the time from air balloons to women s fashions from Baudelaire s poetry to Grandville s cartoons as anticipations of social utopia and simultaneously as clues for a radical political critique Buck Morss plots Benjamin s intellectual orientation on axes running east and west north and south Moscow Paris Berlin Naples and shows how such thinking in coordinates can explain his understanding of dialectics at a standstill She argues for the continuing relevance of Benjamin s insights but then allows a set of afterimages to have the last word Paperbound Books for Young People ,1980
