

## Lesson Plan

**Subject:** Pre-Algebra-- The Distributive Property

**Grade Level:** 9th Grade

**Length:** 20 minute session

### Common Core Standards:

CCSS.Math.Content.6.EE.A.3

Apply the properties of operations to generate equivalent expressions.

### Learning Objectives:

Students will be able to:

1. Use the distributive property to write equivalent numerical expressions.
2. Use the distributive property to write equivalent algebraic expressions.

### Anticipatory Set:

Students should know how to add, subtract, multiply and divide positive and negative integers.

### Instructional Strategies:

Students are given a "Go sheet"(Attachment #1), personal whiteboard, marker and eraser upon entrance to class.

### Flash Math (1-2 min)

- Instructor calls out a numerical exercise involving addition, subtraction, multiplication or division of integers. Students have 10 seconds to write answers on white board. Instructor calls "Time!" and students are to flash their answers to the instructor. Discussion of answers will be done as necessary.

### Share Objectives/ Agenda for today..

1. Introduce distributive property through a word problem
2. Illustrate distributive property using models
3. Distributive Property numerically and algebraically
4. Do practice problems as time permits

### Guided Lecture (5-6 min):

- Distribute word problem (see Attachment #1)
- Give students 1 min to come up with a problem solving plan individually. Ask students to share their work with a partner. Circle the room and ask some students to put their work on the board for others to see.
- Emphasize:
  - There are multiple ways to solve the problem
  - Distributive property relies on the fact that there is a common factor being multiplied, the 4 (representing the 4 people)
  - Can be shown using a model.

Lesson Plans Larry Zafran, 2010-01-19 This is the third book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It is a book of sixty lesson plans for tutors, parents, and homeschoolers. Each lesson plan includes all the components of a typical classroom lesson, such as aim, motivation, warm-up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. The math content in this book is directly aligned and ideally used in conjunction with the first book of the series and its companion workbook of practice exercises. It covers the topics which comprise the foundation of math, beginning with lessons in basic arithmetic, followed by basic operations, negative numbers, fractions, decimals, percents, and basic probability and statistics. If these topics are not completely mastered, later work will prove to be quite difficult. This is especially true of algebra. The book includes a chapter on how to be an effective math tutor, as well as a chapter on how to optionally incorporate meditation instruction to help students get into a relaxed and alert state of mind, which is ideal for learning math and taking exams. **Math for Everyone Teachers Edition**
