McGhee, Jr.,2013-11-12 The invasion of land by ocean dwelling plants and animals was one of the most revolutionary events in the evolution of life on Earth yet the animal invasion almost failed twice because of the twin mass extinctions of the Late Devonian Epoch Some 359 to 375 million years ago these catastrophic events dealt our ancestors a blow that almost drove them back into the sea If those extinctions had been just a bit more severe spiders and insects might have become the ecologically dominant forms of animal life on land This book examines the profound evolutionary consequences of the Late Devonian extinctions which shaped the composition of the modern terrestrial ecosystem Only one group of four limbed vertebrates now live on Earth while other tetrapod like fishes are extinct This gap is why the idea of fish with feet seems so peculiar yet these animals were once a vital part of our world **The Wishing Book 3 - Extermination** Grahame Howard,2010-05-28 Since their last expedition to Planet Mars John Penny Aaron and Jimmy return to Tenerife on holiday at the villa next door to Pedro Armaz Their family friend Ronnie Vines his wife Sarah and Ronnie s new friend Jeremy Byrne accompany them Ronnie has been anxious to write a children s space fantasy about Planet Mars and Jeremy has offered to help They feel that visiting Mount Teide in Tenerife will help them take
