Beijing Peking:

The New Horizon of China's Economic Law Theory Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to the future development of economic law theory Distributive Institutions Shouwen

Zhang, 2020-12-29 The crisis of distribution is one of the longest standing and most complicated issues facing human society Imbued with social political historic and cultural elements it varies significantly across different countries as a result of all these factors As an emerging economy which transferred from a planned to a market economy China has experienced large distribution gaps since it implemented the Reform and Opening up Policy in the early 1980s requiring stronger economic law to mitigate and regulate the crisis of distribution In this second volume the author analyses crises of distribution from a theoretical perspective and proposes law and policy solutions Believing that such crises are a collective result of systematic limitations the author proposes a theoretical framework of system distribution development in order to resolve distribution problems and promote economic development He argues that a crisis of distribution cannot be avoided without coordinated development of economic law and relevant constitutional civil and commercial law systems In addition it is necessary to differentiate the territories industries enterprises and individuals that constitute such diverse systems The book should be of keen interest to researchers and students of law economics and political science **Internationalisation of Chinese**

Enterprises Jia Zongda, 2021-05-30 This book investigates cross border mergers and acquisitions M A conducted by Chinese enterprises seeking to evaluate the pivotal factors that influence the results of this dominant form of China s outbound direct investment In contrast to previous studies the author places a particular focus on the provenance of the supply side as a determinant of overseas M A comparing acquisitions where target companies originate from developed and developing countries Other major indices identified include cultural and industrial differences between targets and buyers enterprise ownership deal payment forms types of consolidation and the market environment Based on investment theories quantitative

analyses and several in depth case studies the book elucidates how these factors synergistically determine the success or failure of an acquisition attempt and the short and long term performance of Chinese companies M A undertakings This work will be a practical reference for M A practitioners as well as academics interested in transnational corporations and mergers capital market and international investment
