Infrastructure Group. Urban

Development, 2000 This report incorporates the World Bank's new strategy for an urbanizing world. It recognizes that cities and towns form the frontline in a global campaign to address issues of poverty and development opportunity. Guided by a vision of sustainable cities that are livable, competitive, well-governed and managed, and bankable, this study argues that the Bank needs to view the city holistically while intervening selectively to facilitate city-led development processes as well as support sound national urban policy frameworks, invest widely in urban knowledge generation, dissemination and capacity building, and work through strengthened public and private partnerships at local, national and international levels. Cities in Transition: from the Ancient World to Urban America Frank J. Coppa, Philip C. Dolce, 1974 Twenty-four articles by experts in different fields focus upon medieval Italian Renaissance and modern African cities, industrialization in Europe and the problems of urban America. **Small Cities in Transition** Herrington J. Bryce, 1977 Ecological and Digital Transition in Cities Francesca Moraci, Carmelina Bevilacqua, Pasquale Pizzimenti, 2025-04-26 This open access book delves into the intersection of ecological, technological and social dynamics at the core of urban transition and the relevance of urban planning and design in addressing the pressing challenges faced by cities and regions in the 21st century. This book is held at Networks, Markets, People, Communities, Institutions and Enterprises toward post-humanism, epistemologies and AI challenges. May 22-25, 2024, Reggio Calabria, Italy. The papers included in the book follow two main drivers. The first is dedicated to discussing the concept of ecosystem services, exploring the role of policy and governance mechanisms in promoting the integration of ecosystem services into urban planning and design practices. The second presents various data-driven perspectives, methodologies, frameworks and case studies for measuring ecosystem services in cities, ranging from traditional methods to cutting-edge digital mapping and modeling techniques. The book primarily targets academics, researchers and students (undergraduate, postgraduate, Ph.D. students) providing interesting insights on the topic that can be useful for urban planning and design courses in the urban studies, architecture and engineering fields. It targets also policymakers, experts, professionals and consultants active in the urban planning and design field involved in managing the transition of regions and cities.
