## City State And World State:

City-state and World State in Greek and Roman Political Theory Until Augustus Mason Hammond,1966     **Ancient Greece and Rome** Keith Hopwood,1995 Sir Thomas Fairfax not Oliver Cromwell was creator and commander of Parliament's New Model Army from 1645 to 1650 Although Fairfax emerged as England's most successful commander of the 1640s this book challenges the orthodoxy that he was purely a military figure showing how he was not apolitical or disinterested in politics The book combines narrative and thematic approaches to explore the wider issues of popular allegiance puritan religion concepts of honour image reputation memory gender literature and Fairfax's relationship with Cromwell Black Tom delivers a groundbreaking examination of the transformative experience of the English revolution from the viewpoint of one of its leading yet most neglected participants It is the first modern academic study of Fairfax making it essential reading for university students as well as historians of the seventeenth century Its accessible style will appeal to a wider audience of those interested in the civil wars and interregnum more generally     **Debating Empire** Stanley Aronowitz,2003-12-17 This text draws together the debate surrounding Hardt and Negri's Empire     **Proceedings of the Aristotelian Society** Aristotelian Society (Great Britain),1917 List of members in each volume     *International Legal Personality* Fleur Johns,2017-07-05 Who or what is entitled to act on the international plane Where should responsibility for violations of international law lie What sort of entities are capable of possessing international legal rights What is the status of individuals minority groups non governmental bodies international organisations and animals in the international legal order and how has their status shifted over time International Legal Personality contains fourteen articles that address these and related questions In historical and contemporary writings international lawyers grapple with the nature of legal identity and confront global distributions of authority and responsibility as they explore who or what is a person in the international legal order These essays document the emergence of an international legal order increasingly conceived in terms of patterns and probabilities rather than as the stagecraft of a small company of permanent players     **Banking** ,1921     **The Ancient World from the Earliest Times to 800 A.D.** Willis Mason West,1904     The South Atlantic Quarterly John Spencer Bassett,Edwin Mims,William Henry Glasson,William Preston Few,William Kenneth Boyd,William Hane Wannamaker,1908

Kohr shows that throughout history people living in small states are happier more peaceful more creative and more prosperous He argues that virtually all our political and social problems would be greatly diminished if the world s major countries were to dissolve back into the small states from which they sprang Rather than making even larger political unions in the mistaken belief that this will bring peace and security we should minimise the aggregation of power by returning to a patchwork of small relatively powerless states where leaders are accessible to and responsive to the people Originally published in 1957 this new edition features forewords by Neal Ascherson and Richard Body The material has been noted for its striking relevance to the current political situation with globalisation war nuclear weapons and the rise of electronic gadgets leading to concern over whether we should re examine the implications of the size of political groupings whether they be states nations or federations In these turbulent times recognise the beauty and potential in small political nations with this inspiring read
