An Introduction To Tivoli Enterprise Ibm Redbook

Chuck Ballard,Ute Baumbach,Holly Hayes,Marcia Miskimen,Lakshmi Palaniappan,Marichu Scanlon,Yong Hua Zeng,IBM Redbooks

An Introduction To Tivoli Enterprise Ibm Redbook:

IBM Tivoli System Automation for Z/OS Enterprise Automation Budi Darmawan,Adam Palmese,Andrew McIntyre,Francisco Duarte,Mark Talstein,2007 This IBM Redbooks publication provides an overview of IBM Tivoli System Automation for z OS concepts and new features We also discuss some considerations on migrating non IBM products to IBM Tivoli System Automation for z OS The discussion is primarily aimed at technical professionals that are looking to understand the IBM Tivoli System Automation for z OS new features and find migration options This book explains some important features of IBM Tivoli System Automation for z OS including using the Processor Operations feature integration with IBM Tivoli OMEGAMON Classic and integration with End to end automation feature of the IBM System Automation for Multiplatform We will also discuss the available services from the Software Migration Project Office that provide migration services for mainframe based products including IBM Tivoli System Automation for z OS in this new implementation of IBM Tivoli System Automation for z OS We also provide some overview of the migration procedures from non IBM products

IBM GDPS: An Introduction to Concepts and Capabilities Mairi Jane Lee,Ayrton Gomes Ribeiro,David Matoe,Rosazila Musa,Marie-France Narbey,Ben Younger,IBM Redbooks,2025-10-07 This IBM Redbooks publication presents an overview of the IBM GDPS offerings and the roles they play in delivering a business IT resilience solution The book begins with general concepts of business IT resilience and disaster recovery DR along with issues that are related to high application availability data integrity and performance These topics are considered within the framework of government regulation increasing application and infrastructure complexity and the competitive and rapidly changing modern business environment Next it describes the GDPS family of offerings with specific reference to how they can help you achieve your defined goals for high availability and disaster recovery HADR Also covered are the features that simplify and enhance data replication activities the prerequisites for implementing each offering and tips for planning for the future and immediate business requirements Tables provide easy to use summaries and comparisons of the offerings The extra planning and implementation services available from IBM also are explained Then several practical client scenarios and requirements are described along with the most suitable GDPS solution for each case The introductory chapters of this publication are intended for a broad technical audience including IT System Architects Availability Managers Technical IT Managers Operations Managers System Programmers and Disaster Recovery Planners The subsequent chapters provide more technical details about the GDPS offerings and each can be read independently for those readers who are interested in specific topics Therefore if you read all of the chapters be aware that some information is intentionally repeated **IBM GDPS Active/Active Overview and Planning** Lydia Parziale,Juliet Candee,Jiong Fan,Paulo Shimizu,Sidney Varoni Jr,Shu Xie,IBM Redbooks,2015-12-15 IBM Geographically Dispersed Parallel SysplexTM GDPS is a collection of several offerings each addressing a different set of IT resiliency goals It can be tailored to meet the recovery point objective RPO which is how much data can you are willing to

lose or recreate and the recovery time objective RTO which identifies how long can you afford to be without your systems for your business from the initial outage to having your critical business processes available to users Each offering uses a combination of server and storage hardware or software based replication and automation and clustering software technologies This IBM Redbooks publication presents an overview of the IBM GDPS active active GDPS AA offering and the role it plays in delivering a business IT resilience solution   Fundamentals of EMS, NMS and OSS/BSS Jithesh Sathyan,2016-04-19 In this era where data and voice services are available at a push of a button service providers have virtually limitless options for reaching their customers with value added services The changes in services and underlying networks that this always on culture creates make it essential for service providers to understand the evolving business logi

   IBM Tivoli Storage Area Network Manager Charlotte Brooks,Michel Baus,Michael Benanti,Ivo Gomilsek,Urs Moser,2003 Now that you have installed your SAN how are you going to manage it This IBM Redbooks publication describes the new product IBM Tivoli Storage Area Network Manager an active intelligent business centric management solution for storage resources across the enterprise IBM Tivoli Storage Area Network Manager provides effective discovery and presentation of SAN physical and logical topologies and provides multiple views of the SAN including zones Through its interface it can be configured to show historical and real time monitoring of SAN fabric devices With IBM Tivoli Storage Area Network Manager you will know what s on your SAN how the devices are connected and how storage is assigned to the hosts If something goes wrong or new devices are added the topology display automatically updates to show the changed topology SAN generated events can be displayed on the manager system or forwarded to another SNMP manager or Tivoli Enterprise Console This book is written for those who want to learn more about IBM Tivoli SAN Manager as well as those who are about to implement it   **SAN Multiprotocol Routing: An Introduction and Implementation** Jon Tate,Steve Fodor,Jure Arzensek,IBM Redbooks,2006-11-09 This IBM Redbooks publication supersedes both IBM TotalStorage Introduction to SAN Routing SG24 7119 00 Implementing the IBM TotalStorage Multiprotocol Routers SG24 7246 00 The rapid spread and adoption of production storage area networks SANs has fuelled the need for multiprotocol routers The routers provide improved scalability security and manageability by enabling devices in separate SAN fabrics to communicate without merging fabrics into a single large SAN fabric This capability enables clients to initially deploy separate SAN solutions at the departmental and data center levels Then clients can consolidate these separate solutions into large enterprise SAN solutions as their experience and requirements grow and change Alternatively multiprotocol routers can help to connect existing enterprise SANs for a variety of reasons For instance the introduction of Small Computer System Interface over IP iSCSI provides for the connection of low end low cost hosts to enterprise SANs The use of an Internet Protocol IP in the Fibre Channel FC environment provides for resource consolidation and disaster recovery planning over long distances And the use of FC FC routing services provides connectivity between two or more fabrics without having to merge them into a single SAN

This book targets storage network administrators system designers architects and IT professionals who sell design or administer SANs It introduces you to the products concepts and technology in the IBM System Storage SAN Routing portfolio This book shows the features of each product and examples of how you can deploy and use them   Performance Management: Using IBM InfoSphere Optim Performance Manager and Query Workload Tuner Chuck Ballard,Ute Baumbach,Holly Hayes,Marcia Miskimen,Lakshmi Palaniappan,Marichu Scanlon,Yong Hua Zeng,IBM Redbooks,2013-11-27 This IBM Redbooks publication describes the architecture and components of IBM InfoSphere OptimTM Performance Manager Extended Edition Intended for DBAs and those involved in systems performance it provides information for installation configuration and deployment InfoSphere Optim Performance Manager delivers a new paradigm used to monitor and manage database and database application performance issues It describes product dashboards and reports and provides scenarios for how they can be used to identify diagnose prevent and resolve database performance problems IBM InfoSphere Optim Query Workload Tuner facilitates query and query workload analysis and provides expert recommendations for improving query and query workload performance Use InfoSphere Optim Performance Manager to identify slow running queries top CPU consumers or query workloads needing performance improvements and seamlessly transfer them to InfoSphere Optim Query Workload Tuner for analysis and recommendations This is done using query formatting annotated with relevant statistics access plan graphical or hierarchical views and access plan analysis It further provides recommendations for improving query structure statistics collection and indexes including generated command syntax and rationale for the recommendations   IBM Tivoli Storage Resource Manager Charlotte Brooks,Michel Baus,Michael Benanti,Ivo Gomilsek,Urs Moser,2003 Storage growth continues to accelerate and the cost of disk can approach 80% of total system hardware costs Yet the storage in most businesses is typically only about 50% used How can you take control of your storage assets to render utilization more efficient and make the most of your storage dollars IBM Tivoli Storage Resource Manager helps you discover monitor and create enterprise policies for your filesystems and databases You will find out where all your storage is going and be able to act intelligently on this information Application availability is improved because you will have early warnings when filesystems are running out of space If you are thinking about server consolidation you can use IBM Tivoli Storage Resource Manager to help efficiently utilize your accumulated storage resources This IBM Redbooks publication shows how to install configure and protect the IBM Tivoli Storage Resource Manager environment how to create policies how to define automated actions like scripts or SNMP events when policies are violated and how to produce detailed meaningful storage reports This book is intended for those who want to learn more about IBM Tivoli Storage Resource Manager and for those who are about to implement it The second edition of this book is updated for IBM Tivoli Storage Resource Manager Version 1 2 Please note that the additional material referenced in the text is not available from IBM   **Tivoli Integration Scenarios** Redbooks Tivoli Integration Scenarios

Team IBM,Andre Ricardo Cavalcanti de Araujo,Antonio Orlando Neto,Ayron Dal Pont,Bill J Layne,Bruno Caiado Paranhos Carneiro,Bruno Nogueira Costa,Carlos Alexandre Salgado Penante,Carlos Felipe Franca da Fonseca,Carolina Escribano Sanchez,Datta S Khot,David Kwock,David Stephenson,Diogo Tadeu Silva de Araujo,Douglas Barranqueiros Gomes,Eravimangalath P Naveen,Krishnan Venkitasubramanian,Leucir Marin Junior,Harshini Mariswamy,Johan Raeymaeckers,Marcel Dubiella Ferreira de Oliveira,Marcel Laurenz,Marianne Hardh,Mario Schuerewegen,Miguel Sanders,Murat Kipel,Rishikesh Kumar,Neetha Mangalore,Ozgun Odabasi,Pankaj Pandey,Rafael Risso Moleiro,Sabri Kizanlik,Sandy Cash,Soumyadeep Paul,Tomasz Sekman,Vasfi Gucer,Yatresh K Agarwal,IBM Redbooks,2011-01-11 This IBM Redbooks publication provides a broad view of how Tivoli system management products work together in several common scenarios You must achieve seamless integration for operations personnel to work with the solution This integration is necessary to ensure that the product can be used easily by the users Product integration contains multiple dimensions such as security navigation data and task integrations Within the context of the scenarios in this book you see examples of these integrations The scenarios implemented in this book are largely based on the input from the integration team and several clients using IBM products We based these scenarios on common real life examples that IT operations often have to deal with Of course these scenarios are only a small subset of the possible integration scenarios that can be accomplished by the Tivoli products but they were chosen to be representative of the integration possibilities using the Tivoli products We discuss these implementations and benefits that are realized by these integrations and also provide sample scenarios of how these integrations work This book is a reference guide for IT architects and IT specialists working on integrating Tivoli products in real life environments **IBM Tivoli Asset Management for IT Portfolio Overview** Bart Jacob,Nicholas Ara,Michael Beres,David Boggs,Carmen Ces,Julio Zaima,2007 This IBM Redbooks publication provides an overview of the IBM Tivoli Asset Management for IT portfolio The portfolio is made up of the three primary products IBM Tivoli Asset Management for IT IBM Tivoli License Compliance Manager for z OS and IBM Tivoli License Compliance Manager By using these products together you can implement a comprehensive IT asset management solution This book provides a functional overview of each of the products in the portfolio and also provides example scenarios of how they can be used to address IT asset management disciplines The IBM Tivoli Asset Management for IT product is a relatively new acquisition It has its roots in enterprise asset management and has very rich function This product will be enhanced and adapted to provide functions specific to IT asset management such as facilities to handle contract management full asset life cycle management integration with Enterprise Resource Planning ERP solutions and much more This book introduces the portfolio and describes its current capabilities Our intention for the future is to provide additional materials for a deeper understanding of best practices for using the portfolio to implement a complete IT asset management solution **IBM WebSphere Appliance Management Center for WebSphere Appliances** Earl Ashley,Fernando Ewald,Dr. Chris Poole,Pablo Sanchez,IBM Redbooks,2013-04-19 IBM

WebSphere Appliance Management Center for WebSphere Appliances simplifies the management and monitoring of environments that consist of multiple IBM WebSphere DataPower Appliances This web based application provides centralized multi appliance administration to support daily WebSphere DataPower Appliance operation WebSphere Appliance Management Center for WebSphere Appliances provides the following key services Centralized firmware management Disaster recovery Domain and service configuration Configuration life cycle deployment Monitoring multiple appliances collecting key metrics and presenting them in a central location This IBM Redbooks publication helps administrators of WebSphere DataPower Appliances to perform daily administration tasks by using WebSphere Appliance Management Center The topics in this book include health monitoring of an environment disaster recovery secure backup and restore firmware management and environment promotion This book also includes best practices tips and techniques and general recommendations for administrators of WebSphere DataPower Appliance deployments **IBM Journal of Research and Development** ,2005 Extend the CICS Explorer: A Better Way to Manage Your CICS Chris Rayns,Scott Clee,Taku Miura,Shayla Robinson,Yusuke Tamura,John Taylor,Steve Wall,IBM Redbooks,2010-05-03 CICS ExplorerTM is the latest significant evolution in the management and analysis of your CICS environment It is a statement of intent from the CICS Development organization which is determined to ensure you can manage your CICS estate in a simple and easily extensible way using a combination of the following approaches Tried and trusted CICS expertise and technology The widely accepted user interfaces and integration power of the open source Eclipse platform Web 2 0 and RESTful programming this technology underpins the CICS Explorer concept This IBM Redbooks publication shows how you can use the extensible design of CICS Explorer to complement the functionality already provided with added functionality tailored to the needs of your business We show you how to perform the following tasks Install the CICS plug in SDK into your eclipse environment Develop a simple plug in for the CICS Explorer Deploy the plug in into CICS Explorer We provide several useful examples of plug ins that we developed during the residency using the methodology we describe The starting point for the book is that you already have CICS Explorer installed and configured with connectivity to your CICS region or CICSPlex and that you are looking for ways to customize CICS Explorer **Deployment Guide Series** Vasfi Gucer,Frederic Marsaud,Haakan Gradin,John Willis,2006 IBM Tivoli Monitoring Express Version 6 1 is a powerful affordable and easy to use availability management solution designed to help small to mid sized companies manage IT infrastructures It offers the ability to manage bottlenecks performance impacts and outages across heterogeneous environments from a single centralized portal IBM Tivoli Monitoring Express V6 1 is easy to install easy to deploy and easy to use providing rapid time to value It provides real time and historical data that enables you to quickly diagnose and solve issues with the new GUI through the IBM Tivoli Enterprise Portal component This IBM Redbooks publication presents a deployment guide for IBM Tivoli Monitoring Express V6 1 We describe planning installing and troubleshooting IBM Tivoli Monitoring Express V6 1 In addition we provide some case

studies that you can use as part of a proof of concept or a customer demonstration The target audience for this book is IT specialists working on new IBM Tivoli Monitoring Express V6 1 installations Please note that the additional material referenced in the text is not available from IBM   **Acta cybernetica** ,2001   **IBM Tivoli Directory Server for Z/OS** Karan Singh,Corey Bryant,Jonathan Cottrell,Gillian Gainsford,Saheem Granados,Robert Green,Diane Lia,Nilesh Patel,John Walsh,2011 This IBM Redbooks publication examines the IBM Tivoli Directory Server for z OS IBM Tivoli Directory Server is a powerful Lightweight Directory Access Protocol LDAP infrastructure that provides a foundation for deploying comprehensive identity management applications and advanced software architectures This publication provides an introduction to the IBM Tivoli Directory Server for z OS that provides a brief summary of its features and a examination of the possible deployment topologies It discusses planning a deployment of IBM Tivoli Directory Server for z OS which includes prerequisites planning considerations and data stores and provides a brief overview of the configuration process Additional chapters provide a detailed discussion of the IBM Tivoli Directory Server for z OS architecture that examines the supported back ends discusses in what scenarios they are best used and provides usage examples for each back end The discussion of schemas breaks down the schema and provides guidance on extending it A broad discussion of authentication authorization and security examines the various access protections bind mechanisms and transport security available with IBM Tivoli Directory Server for z OS This chapter also provides an examination of the new Password Policy feature Basic and advanced replication topologies are also covered A discussion on plug ins provides details on the various types of plug ins the plug in architecture and creating a plug in and provides an example plug in Integration of IBM Tivoli Directory Server for z OS into the IBM Workload Manager environment is also covered This publication also provides detailed information about the configuration of IBM Tivoli Directory Server for z OS It discusses deploying IBM Tivoli Directory Server for z OS on a single system with examples of configuring the available back ends Configuration examples are also provided for deploying the server in a Sysplex and for both basic and advanced replication topologies Finally it provides guidance on monitoring and debugging IBM Tivoli Directory Server for z OS   IBM Intelligent Operations Center for Smarter Cities Administration Guide Bhowmick Arundhati,Eduardo Francellino,Luis Glehn,Robert Loredo,Pam Nesbitt,Shi Wei Yu,Sunil Mishr,IBM Redbooks,2012-11-30 IBM defines a smarter city as one that makes optimal use of all available information to better understand and control its operations and optimize the use of resources There is much information available from different sources However city officials often lack the holistic view of the city s operations that is required to respond to the citizens needs in a timely manner and use the city resources wisely IBM Intelligent Operations Center delivers a unified view of city agencies providing three primary elements for successful management of cities use information anticipate problems and coordinate actions and resources Chapter 1 of this IBM Redbooks publication introduces the IBM Intelligent Operations Center solution The chapter provides a high level overview of its features benefits and architecture This information is

intended for city officials and IT architects that must understand the business value of IBM Intelligent Operations Center and its architecture The remaining chapters of this book focus on information that help IBM Intelligent Operations Center administrators perform daily administration tasks This book describes commands and tools that IBM Intelligent Operations Center administrators must use to keep the solution running troubleshoot and diagnose problems and perform preventive maintenance This book includes preferred practices tips and techniques and general suggestions for administrators of IBM Intelligent Operations Center on premises deployments For related information about this topic refer to the following IBM Redbooks publications IBM Intelligent Operations Center for Smarter Cities Redpaper REDP 4939 IBM Intelligent Operations Center for Smarter Cities Solution Guide **Deployment Guide Series** ,2008 *IBM Framework for E-business* I B M,2001 <u>IBM Tivoli Directory Server for z/OS</u> Karan Singh,Corey C Bryant,Jonathan Cottrell,Gillian Gainsford,Saheem Granados,Robert Green,Diane Lia,Nilesh T Patel,John M Walsh,IBM Redbooks,2011-07-07 This IBM Redbooks publication examines the IBM Tivoli Directory Server for z OS IBM Tivoli Directory Server is a powerful Lightweight Directory Access Protocol LDAP infrastructure that provides a foundation for deploying comprehensive identity management applications and advanced software architectures This publication provides an introduction to the IBM Tivoli Directory Server for z OS that provides a brief summary of its features and a examination of the possible deployment topologies It discusses planning a deployment of IBM Tivoli Directory Server for z OS which includes prerequisites planning considerations and data stores and provides a brief overview of the configuration process Additional chapters provide a detailed discussion of the IBM Tivoli Directory Server for z OS architecture that examines the supported back ends discusses in what scenarios they are best used and provides usage examples for each back end The discussion of schemas breaks down the schema and provides guidance on extending it A broad discussion of authentication authorization and security examines the various access protections bind mechanisms and transport security available with IBM Tivoli Directory Server for z OS This chapter also provides an examination of the new Password Policy feature Basic and advanced replication topologies are also covered A discussion on plug ins provides details on the various types of plug ins the plug in architecture and creating a plug in and provides an example plug in Integration of IBM Tivoli Directory Server for z OS into the IBM Workload Manager environment is also covered This publication also provides detailed information about the configuration of IBM Tivoli Directory Server for z OS It discusses deploying IBM Tivoli Directory Server for z OS on a single system with examples of configuring the available back ends Configuration examples are also provided for deploying the server in a Sysplex and for both basic and advanced replication topologies Finally it provides guidance on monitoring and debugging IBM Tivoli Directory Server for z OS

This Engaging Realm of E-book Books: A Thorough Guide Revealing the Pros of E-book Books: A World of Ease and Versatility Kindle books, with their inherent portability and simplicity of access, have freed readers from the constraints of physical books. Gone are the days of carrying bulky novels or meticulously searching for particular titles in shops. E-book devices, stylish and portable, seamlessly store an extensive library of books, allowing readers to indulge in their preferred reads whenever, anywhere. Whether traveling on a busy train, lounging on a sunny beach, or just cozying up in bed, Kindle books provide an unparalleled level of ease. A Reading World Unfolded: Discovering the Wide Array of E-book An Introduction To Tivoli Enterprise Ibm Redbook An Introduction To Tivoli Enterprise Ibm Redbook The Kindle Store, a virtual treasure trove of literary gems, boasts an wide collection of books spanning varied genres, catering to every readers taste and preference. From captivating fiction and mind-stimulating non-fiction to timeless classics and modern bestsellers, the E-book Store offers an exceptional abundance of titles to discover. Whether looking for escape through engrossing tales of fantasy and exploration, delving into the depths of past narratives, or broadening ones knowledge with insightful works of scientific and philosophy, the Kindle Shop provides a gateway to a literary universe brimming with limitless possibilities. A Transformative Force in the Bookish Landscape: The Enduring Influence of E-book Books An Introduction To Tivoli Enterprise Ibm Redbook The advent of Kindle books has certainly reshaped the literary scene, introducing a paradigm shift in the way books are released, disseminated, and consumed. Traditional publishing houses have embraced the digital revolution, adapting their strategies to accommodate the growing demand for e-books. This has led to a rise in the availability of E-book titles, ensuring that readers have access to a vast array of literary works at their fingers. Moreover, Kindle books have equalized access to literature, breaking down geographical limits and offering readers worldwide with equal opportunities to engage with the written word. Regardless of their place or socioeconomic background, individuals can now immerse themselves in the intriguing world of books, fostering a global community of readers. Conclusion: Embracing the Kindle Experience An Introduction To Tivoli Enterprise Ibm Redbook Kindle books An Introduction To Tivoli Enterprise Ibm Redbook, with their inherent convenience, versatility, and wide array of titles, have undoubtedly transformed the way we encounter literature. They offer readers the freedom to explore the boundless realm of written expression, anytime, anywhere. As we continue to navigate the ever-evolving online landscape, Kindle books stand as testament to the lasting power of storytelling, ensuring that the joy of reading remains reachable to all.
