The Role of Letter-Speech Sound Integration in Typical and Atypical Reading Development Jurgen Tijms, Silvia Brem, Gorka Fraga González, Iliana I. Karipidis, 2020-07-24 Fluency is the quintessence of effective reading To obtain socio economic success fluent reading is of primordial importance and reading is considered a crucial marker of an individual's life course Approximately 5% of children are affected by developmental dyslexia exhibiting inaccurate word recognition spelling phonological decoding and most importantly severely dysfluent reading which remains as their most characterizing and persistent deficit Unable to attain society's literacy demands individuals with dyslexia are at severe risk for adverse academic economic and psychosocial consequences Recently it has been posed that the development of automatic letter speech sound LSS integration is critical in the acquisition of fluent reading skills and in particular that a failure to develop automatic LSS integration results in an impairment of reading fluency In support neurocognitive research has suggested that the development of automatized processing of LSS associations is an essential step in the formation of a functional neural network for reading Furthermore both neurocognitive and behavioural studies have suggested a less efficient LSS integration in children with dyslexia than in typical readers Finally results from intervention studies have suggested that

Research Libraries, 1998 *Early Childhood Development: A Multicultural Perspective* Jeffrey Trawick-Smith, 2024-06-04 *Early Childhood Development A Multicultural Perspective* 6 e addresses both typical and atypical child development from birth through age eight. This text highlights the diversity of child development, preparing professionals to meet the unique needs of children from a wide variety of backgrounds. From reviews of *Early Childhood Development A Multicultural Perspective*, I believe that overall the textbook is unique in its multicultural approach. It is also very reader-friendly and contains the information that is essential to understanding the development of children. This text is one of the few that truly does focus on the early development years. Additionally, it is one of the only texts that has the multicultural emphasis. Keri Maxwell, West Virginia University. I use the text because it is the only one that I have found with a true multicultural focus throughout, not just a multicultural chapter at the end of the book. The writing is excellent, especially helpful are the examples and vignettes. The book gives multiple examples of how content is applied, gives a review of important points, and gives application ideas at the end of each chapter. A strength of Chapter 18 is looking at family issues, poverty, oppression, etc., and going through the different age ranges covered in this book. That helped to integrate that knowledge about families and apply it across ages. Sandra Newcomb, University of Maryland College Park. Excellent text. The author has done an outstanding job of presenting key concepts in a readable, understandable, and relational way. Excellent Research into Practice feature.
