

THE ANALYSIS OF SOCIAL PROBLEMS*

T. S. Simey

Social researches can be divided between two classes: in the first place there are those in which the researcher endeavours to refrain from compromising his objectivity in any way; secondly, there are those in which he deliberately surrenders it in exchange for a deeper insight into the human problems involved in the situation he studies. The division between the two classes has resulted from the attempts which the social scientist has made to organise and interpret his material in such a way that its significance can be established on a double standard, i.e., both intensively and extensively. First of all he has to show that something of importance can be proved from his premises and his evidence, which requires intensive analysis; secondly, he must also demonstrate that the generalisations he propounds are valid within reasonably wide limits, which involves an approach from a much wider angle. He must avoid, on the one hand, sweeping conclusions about human behaviour which are universal but merely trite. And he must beware, on the other, of the observations about the way this or that community 'fits together' or in which individuals have behaved in an experimental or a clinical setting, for though these may touch on matters of general interest, they may possibly be valid only for the particular individuals, societies or cultures concerned.¹

'Objective' social research has the great advantage that it lends itself to the use of quantitative methods, and the limits within which the results are valid can be clearly stated, as for instance in the work of the demographer. On the other hand, the claim sometimes made that 'objective' research is the only scientific work which has been carried out in the social field ignores the fact that those who attempt to rely exclusively on these methods of enquiry are necessarily confronted, sooner or later, with the same problems as to ends and values which arise more quickly and more dramatically in the researches in which

Social Problems Ritchie P. Lowry, 1973 Critical analysis and literature survey of social theories and popular myths prevailing in the study of social problems in contemporary society with particular reference to the USA argues that sociologists have characteristically used three basic preoccupations in social research studies of social conflict social change etc namely deviance disorganization and functionalism and presents some potential sources for new paradigms Bibliography pp 301 to 307 and references **The Study of Social Problems** Earl Rubington, 1981 This highly praised book has a strong organizational framework that enables students to make sense of a complex area of study It discusses the development and characteristics of five perspectives on the study of social problems Social Pathology Social Disorganization Value Conflict Deviant Behavior and Labeling **Constructing Social Problems** Malcolm Spector, There is no adequate definition of social problems within sociology and there is not and never has been a sociology of social problems That observation is the point of departure of this book The authors aim to provide such a definition and to prepare the ground for the empirical study of social problems They are aware that their objective will strike many fellow sociologists as ambitious perhaps even arrogant Their work challenges sociologists who have over a period of fifty years written treatises on social problems produced textbooks cataloguing the nature distribution and causes of these problems and taught many sociology courses It is only natural that the authors work will be viewed as controversial in light of the large literature which has established a sociology of a wide range of social problems the sociology of race relations prostitution poverty crime mental illness and so forth In the 1970s when the authors were preparing for a seminar on the sociology of social problems their review of the literature revealed the absence of any systematic coherent statement of theory or method in the study of social problems For many years the subject was listed and offered by university departments of sociology as a service course to present undergraduates with what they should know about the various social pathologies that exist in their society This conception of social problems

for several decades has been reflected in the substance and quality of the literature dominated by textbooks In *Constructing Social Problems* the authors propose that social problems be conceived as the claims making activities of individuals or groups regarding social conditions they consider unjust immoral or harmful and that should be addressed This perspective as the authors have formulated it conceives of social problems as a process of interaction that produces social problems as social facts in society The authors further propose that this process and the social facts it produces are the data to be researched for the sociology of social problems This volume will be of interest to those concerned with the discipline of sociology especially its current theoretical development and growth Malcolm Spector was professor of sociology at McGill University in Montreal Canada John I Kitsuse is professor emeritus at the University of California at Santa Cruz He is co author with Leonard Broom of *The Managed Casualty The Japanese American Family in World War II* and co editor with Theodore R Sarbin of *Constructing the Social* *Social Problems in Our Time* Samuel Kirson Weinberg,1960 *Social problems of urban society in the contemporary U S A* In three parts social processes social factors personality organization and traits **Social Problems** Anna Leon-Guerrero,2024-12-16 In *Social Problems* Anna Leon Guerrero provides a thorough exploration of the social problems that permeate our world today and provides readers with the tools to contribute toward real solutions The Eighth Edition offers a blend of sociological analysis policy review and stories of social action making it an essential read for anyone seeking to make a difference in their community *Social Problems and the Sociological Imagination* David R. Neubeck,Mary Alice Neubeck,Davita Silfen Glasberg,2006-04-06 This critical approach to the analysis of social problems facing the world today examines both the causes of those problems and their human implications The fifth edition has been reorganized into four types of social problems Four chapters look at large societal problems involving arrangements of social structures that have a vast impact

how societies operate and the effect of this on the life chances of millions of people five chapters focus on group problems created by social arrangements and relations four chapters focus on institutional problems that derive from the way that social institutions are arranged to address the basic needs of social survival that often benefit some members of society more than others and the final three chapters focus on individual problems such as criminal behavior mental illness and substance abuse

Philosophy and the Social Problem Will Durant,1917 *Social Problems* Sara Towe Horsfall,2018-05-30

This book represents a truly innovative and empowering approach to social problems Instead of focusing solely on a seemingly tireless list of major problems Sara Towe Horsfall considers how select key issues can be solved and pays particular attention to the advocate groups already on the front lines Horsfall first provides a robust theoretical foundation to the study of social problems before moving on to the problems themselves examining each through the lens of specific advocate groups working towards solutions This concise and accessible text also incorporates useful learning tools including study questions to help reinforce reading comprehension questions for further thought to encourage critical thinking and classroom discussion a glossary of key terms and a worksheet for researching advocate groups
