

# Nature vs. Nurture

Biologists believe that environmental influences modify genetic inheritance from the zygote. However, nature is also influencing growth & development by itself. Both these influences are not only of themselves but also of each other. The environment influences the zygote by itself, but the zygote also influences the environment by itself. The zygote is a product of the environment, but the environment is also a product of the zygote.

Biologists believe that both nature and nurture are important in the development of the individual.
