**Fundamentals of Photonics** Bahaa E A Saleh and Malvin C Teich This invaluable work provides a detailed introduction to the fascinating and converging disciplines behind photonics Beginning with a discussion of the four theories of light ray optics wave optics electromagnetic optics and photon optics the theory of interaction of light with matter and the theory of semiconductor materials and their optical properties the text progresses to a survey of the field s up to the minute advances These include a look at Fourier optics and holography guided wave optics and optical fibers statistical optics photonic switching and computing and more Providing applications and examples of real systems the text skillfully balances theory and practice providing engineers researchers in fiber optics and communications and students with an authoritative first look at photonics 1991 0 471 83965 5 700 pp

**Materials for Non-linear and Electro-optics, Proceedings of the INT Conference, Cambridge, England, 4-7 July 1989** M. H. Lyons, 1989 Recent interest in non linear and electro optic materials has been driven by the demand for novel optic and electro optic devices The International Conference on Materials for Non linear and Electro Optics attracted some 100 delegates from 16 countries reflecting the international flavour of this growing subject area The conference provided a forum for the review of recent developments in the preparation of the wide range of materials currently under investigation for

device applications These proceedings bring together selected papers from this conference both invited and contributed oral and poster The main themes covered are inorganic materials especially inorganic crystalline solids organic single crystals characterization of organic materials Langmuir Blodgett films liquid crystals and polymers Researchers in optics and optoelectronics thin film surface science condensed matter physics materials science and physical chemistry will find this volume invaluable
