Analysis Design And Ev:

Integrated Technologies in Electrical, Electronics and Biotechnology Engineering Gaurav Aggarwal, Ashutosh Tripathi, Himani Goyal Sharma, Tripti Sharma, Rishabh Dev Shukla, 2025-03-31 The conference was aimed to bring researchers practicing engineers faculty members and students from across the globe to a common platform to share their research ideas that would pave way to attain solution to various real time problems Many eminent researchers from different countries participated and interacted with the young students and budding researchers from various institutions The objective of this conference was to connect with junior and senior scholars working with educational architecture of the past present or future in the area of Semiconductor Devices Electronic Circuit Design Machine Vision Signal Processing Communication Technologies and Systems Electromagnetic RF Microwave Wearable Technology Nano Technologies IC Fabrication Biotechnology Automation Robotics Electrical Machines and Adjustable Speed Drives Renewable Energy Sources Smart grids Technologies Applications Key features included keynote presentations from renowned experts paper presentations showcasing novel research interactive panel discussions and exploring practical applications of emerging technologies

Biomarkers, Functional Mechanisms, and Therapeutic Potentials in Gastrointestinal Cancers Zequn Li, Kui Zhang, Qun Zhang, Huashan Shi, Dongshi Chen, 2023-11-17 Significant changes in diet environment and population increase gastrointestinal cancer morbidity A growing number of novel biomarkers and underlying mechanisms are being elucidated some of which may even conflict with assumptions of past decades Therefore collecting recent findings on novel diagnostic prognostic factors biomarkers and or risk factors in gastrointestinal cancers is a prerequisite for a better understanding of the disease Despite remarkable progressions in surgical treatments and chemotherapies the prognosis of gastrointestinal cancer is far from satisfactory due to the high occurrence of drug resistance Based on the identification of novel biomarkers as well as their underlying mechanisms targeted drug development will provide significant complementary therapeutic effects to conventional chemoradiotherapies High throughput methods such as next generation sequencing on RNA level and mass spectrometry on protein lipid metabolite level serve as efficient strategies for biomarker identification and drug development This Research Topic aims at presenting recent advances on gastrointestinal cancer biomarkers and their underlying functional mechanisms providing a better understanding of carcinogenesis tumor progression tumor relapse as well as drug resistance This will subsequently contribute to the development of novel therapeutic interventions targeting gastrointestinal cancers thus improving patients outcomes ITJEMAST 12(1) 2021, 2020-11-16 International Transaction Journal of Engineering Management Applied Sciences Technologies publishes a wide spectrum of research and technical articles as well as reviews experiments experiences modelings simulations designs and innovations from engineering sciences life sciences and related disciplines as well as interdisciplinary cross disciplinary multidisciplinary subjects Original work is required Article submitted must not be under consideration of other publishers for publications [http TuEngr.com](http://TuEngr.com)

Artificial Intelligence Applications in Battery Management Systems and Routing Problems in Electric Vehicles

Angalaeswari, S.,Deepa, T.,Kumar, L. Ashok,2023-02-10 In today s modern society to reduce the carbon dioxide gas emission from motor vehicles and to save mother nature electric vehicles are becoming more practical As more people begin to see the benefits of this technology further study on the challenges and best practices is required Artificial Intelligence Applications in Battery Management Systems and Routing Problems in Electric Vehicles focuses on the integration of renewable energy sources with the existing grid introduces a power exchange scenario in the prevailing power market considers the use of the electric vehicle market for creating cleaner and transformative energy and optimizes the control variables with artificial intelligence techniques Covering key topics such as artificial intelligence smart grids and sustainable development this premier reference source is ideal for government officials industry professionals policymakers researchers scholars practitioners academicians instructors and students

Reproductive biology is the mother of other areas in biology as Reproduction had been the main strategy of simple and higher organisms to evolve The utmost fitness in evolutionary tree is biological fitness in being beneficial for successful reproduction In this connection reproductive sciences have been the focus of many research programs Specifically reproductive immunology has received the attention of researchers more than ever This trend is largely due to the industrialization of societies the increase in the age of marriage and as a result the decrease in fertility rates On the other hand despite significant advances in the field of artificial reproductive technologies low success rate of embryo transfer is the main limiting factor for in vitro fertilization treatment Therefore understanding the immunological mechanisms of implantation and the adaptation of the immune cells of the pregnancy site which leads to the maternal immunological tolerance to fetal antigens is of utmost importance Immunological alterations of the female reproductive tract commences from the first exposure to seminal plasma leading to molecular and cellular changes that increase the chance of conception and pregnancy through modulation of inflammatory responses and induction of paternal antigen specific regulatory T cells Steroid hormone directed decidualization of endometrium is the first step for embryo implantation and placental development which eventually leads to immunoregulation of the immune cells residing in the endometrium in favor of pregnancy Following placental development an extensive crosstalk begins among developing trophoblasts decidualized endometrial stromal cells and the decidual immune cells and establishes a unique triangle for induction of maternal immune tolerance All the processes of entire pregnancy are under the tight control of inflammation regulatory mechanisms While acute inflammation is a triggering mechanism of embryo implantation and parturition cell senescence associated with
