A Dynamic Model of Active Portfolio Management and Mutual Fund Performance Evaluation Yonggan Zhao, 2005 We analyze an optimal dynamic portfolio and asset allocation policy for investors who are concerned with the performances of their portfolios relative to a benchmark Assuming that asset returns follow a multi linear factor model similar to the structure of Ross 1976 and that portfolio managers adopt a mean tracking error analysis similar to Roll 1992 we develop a dynamic model of active portfolio management maximizing risk adjusted excess return over a well diversified benchmark Unlike the case of constant proportional portfolios for the standard utility maximization our optimal portfolio policy is state dependent namely a function of time to investment horizon the return on the benchmark portfolio and the return on the investment portfolio itself Based on the analysis in this paper we define a dynamic performance measure which relates portfolio s return to its risk sensitivity Abnormal returns at each point in time are quantified as the difference between the realized and the model fitted returns Risk sensitivity is estimated through a dynamic matching that minimizes the total fitted error of portfolio returns We study portfolio performances for a sample of U S mutual funds with the data from January 2001 to December 2003 To limit biases in the selection of a benchmark for portfolio evaluation we assume that the benchmark portfolio is the minimum variance portfolio composed of the Dow Jones Industrial Average index and the Nasdaq 100 index components We find that majority of the mutual funds have substantially under performed the chosen benchmark Our model also implies an interesting relationship between performance indices and risk sensitivities For the three year data the empirical analysis shows that portfolio performance

indices are related to their estimated risk sensitivities in an open upward quadratic curve *C.F.A. Study Guide* Institute of Chartered Financial Analysts,1992 Directory of Pension Funds and Their Investment Managers ,2009
