Analysis Of Variance For Sensory Data:

Analysis of Variance for Sensory Data Per Lea, Tormod Næs, Marit Rødbotten, 1997-03-06 Analysis of Variance ANOVA is a statistical technique used in a number of chemical areas including the food industry This handbook is a highly readable guide to the uses of the very important technique of ANOVA applied to sensory analysis It is unique in stressing the practical implications of the topic rather than the theoretical background This is important since ANOVA is a complex statistical technique which can be misunderstood and misused by sensory analysts Typical problems from sensory analysis are used as examples

Analyzing Sensory Data with R Sebastien Le, Thierry Worch, Margot Brard, 2018-12-14 Choose the Proper Statistical Method for Your Sensory Data Issue Analyzing Sensory Data with R gives you the foundation to analyze and interpret sensory data The book helps you find the most appropriate statistical method to tackle your sensory data issue Covering quantitative qualitative and affective approaches the book presents the big picture of sensory evaluation Through an integrated approach that connects the different dimensions of sensory evaluation you ll understand The reasons why sensory data are collected The ways in which the data are collected and analyzed The intrinsic meaning of the data The interpretation of the data analysis results Each chapter corresponds to one main sensory topic The chapters start with presenting the nature of the sensory evaluation and its objectives the sensory particularities related to the sensory evaluation details about the data set obtained and the statistical analyses required Using real examples the authors then illustrate step by step how the analyses are performed in R The chapters conclude with variants and extensions of the methods that are related to the sensory task itself the statistical methodology or both

Multivariate Analysis of Data in Sensory Science T. Naes, E. Risvik, 1996-02-01 The state of the art of multivariate analysis in sensory science is described in this volume Both methods for aggregated and individual sensory profiles are discussed Processes and results are presented in such a way that they can be understood not only by statisticians but also by experienced sensory panel leaders and users of sensory analysis The techniques presented are focused on examples and interpretation rather than on the technical aspects with an emphasis on new and important methods which are possibly not so well known to scientists in the field Important features of the book are discussions on the relationship among the methods with a strong accent on the connection between problems and methods All procedures presented are described in relation to sensory data and not as completely general statistical techniques Sensory scientists applied statisticians chemometricians those working in consumer science food scientists and agronomers will find this book of value
