Alternative Wastewater Treatment:

Water Pollution DIANE Publishing Company,1994-12 Discusses whether wastewater treatment costs could be reduced by using alternative wastewater treatment systems Addresses 1 whether there are cost effective alternatives to conventional systems for collecting treating wastewater 2 whether barriers are limiting the use of these alternatives 3 how EPA is addressing the development of future technologies Charts tables *Water Pollution* United States. General Accounting Office,1994 **Alternative Wastewater Treatment** A.S. Eikum,R.W. Seabloom,2012-12-06 Following the end of World War II there was a major migration of population in the United States and Scandinavian countries to urban areas As a result of this migration and in part due to the public works moratoria imposed during the war a major program of sewer construction was instigated which resulted in the collection and subsequent concentration of large volumes of waste water at single discharge points As the assimilative capacity of these receiving waters was exceeded it led to or aggravated existing water pollution problems in these waters To mitigate this degradation of water quality a massive program to construct wastewater treatment facilities was instigated In addition large amounts of money were spent on research to improve the technology of the conventional collection and treatment concept In contrast the wastewater disposal problem of the rural home owner received little attention and in most cases the septic tank soil absorption system ST SAS was the interim solution In recent years there has been a fundamental change in the population growth pattern in the US and Scandinavian countries It appears that a great many people are moving back to rural areas where they seem to prefer the suburban or small town environment yet at the same time want all the conveniences of urban life The provision of proper wastewater disposal facilities presents a very perplexing problem because the capital and operating costs of conventional sewers are usually financially impractical for rural areas Community-managed Septic Systems United States.
