Altruism In New Religious:

Altruism in New Religious Movements □□□□,2004-12 **The Practice of Altruism** Ruben Lf Habito,Keishin Inaba,2008-09 The study of altruism and altruistic behavior has caught the attention of social scientists especially in recent years What motivates individuals to cultivate attitudes and actions that promote the wellbeing of others at the expense of or at the risk of negative consequences for their own In our contemporary global society marked by conflict and violence among different sectors of the population in various regions of the world and wherein religion can be a factor that exacerbates such conflict and violence harnessing the power of religion towards directions of reconciliation creativity and altruistic action remains a crucial task for humankind This volume addresses a question especially relevant in our day do people who profess religious commitment or affiliation in a particular religious community tend to nurture altruistic kinds of attitude and action more than others Social scientists present results of their empirical studies on Japanese society as well as on North American European Indian and Thai societies to focus on this issue and offer insightful reflections on the relationship between religion and society **A Comparative Study of Altruism in New Religious Movements with Special Reference to the Jesus Army and the Friends of the Western Buddhist Order** Keishin Inaba,2000 [The Oxford Handbook of the Sociology of Religion](#) Peter Clarke,2011-02-04 The Oxford Handbook of the Sociology of Religion draws on the expertise of an international team of scholars providing both an entry point into the sociological study and understanding of religion and an in depth survey into its changing forms and content in the contemporary world The role and impact of religion and spirituality on the politics culture education and health in the modern world is rigorously discussed and debated The study of the sociology of religion forges interdisciplinary links to explore aspects of continuity and change in the contemporary interface between society and religion Using a combination of theoretical methodological and content led approaches the fifty seven contributors collectively emphasise the complex relationships between religion and aspects of life from scientific research to law ecology to art music to cognitive science crime to institutional health care and more The developing character of religion irreligion and atheism and the impact of religious diversity on social cohesion are explored An overview of current scholarship in the field is provided in each themed chapter with an emphasis on encouraging new thinking and reflection on familiar and emergent themes to stimulate further debate and scholarship The resulting essay collection provides an invaluable resource for research and teaching in this diverse discipline *Altruism in World Religions* Suzanne Neusner,Bruce Chilton,2005-11-08 In 1830 philosopher Auguste Comte coined the term altruism to provide a general definition for the act of selflessly caring for others But does this modern conception of sacrificing one s own interests for the well being of others apply to the charitable behaviors encouraged by all world religions In *Altruism in World Religions* prominent scholars from an array of religious perspectives probe the definition of altruism to determine whether it is a category that serves to advance the study of religion Exploring a range of philosophical and religious thought from Greco

Roman philia to Judaism Christianity and Islam from Hinduism in India to Buddhism and the religions of China and Japan the authors find that altruism becomes problematic when applied to religious studies because it is in fact a concept absent from religion Chapters on Judaism Christianity and Islam reveal that followers of these religions cannot genuinely perform self sacrificing acts because God has promised to reward every good deed Moreover the separation between the self and the other that self sacrifice necessarily implies runs counter to Buddhist thought which makes no such distinction By challenging our assumptions about the act of self sacrifice as it relates to religious teachings the authors have shown altruism to be more of a secular than religious notion At the same time their findings highlight how charitable acts operate with the values and structures of the religions studied

Altruism and Christian Ethics Colin Grant,2000-11-16 Separated from its anchorage in religion ethics has followed the social sciences in seeing human beings as fundamentally characterised by self interest so that altruism is either naively idealistic or arrogantly self sufficient Colin Grant contends that as a modern secular concept altruism is a parody on the self giving love of Christianity so that its dismissal represents a social levelling that loses the depths that theology makes intelligible and religion makes possible The Christian affirmation is that God is characterised by self giving love agape then expected of Christians Lacking this theological background the focus on self interest in sociobiology and economics and on human realism in the political focus of John Rawls or the feminist sociability of Carol Gilligan finds altruism naive or a dangerous distraction from real possibilities of mutual support This book argues that to dispense with altruism is to dispense with God and with the divine transformation of human possibilities

Religion for the 21st Century Stephen Gislason, 2018-05-30 This book provides a fresh perspective on world religions I describe some of the more obvious religious traditions on the planet and note similarities and differences I am writing brief descriptions as if I were a tour guide introducing a stranger to the history real and imagined of five of the more obvious religions My wish is that even people who live in the cognitive box created by one group will take a vacation fly outside of your container and enjoy an overview of humans past present and future If you can go beyond beliefs faith claims arguments and the narcissism that afflicts all of us then you ask does membership in any religious group bring us closer to living in a peaceful constructive sustainable society

From the Preface Any discussion of religion invites misunderstanding and conflict Humans have convened in small groups for thousands of years to celebrate to appease evil spirits and to encourage good spirits to offer more privileges and benefits Humans continue to dress up in costumes beat drums chant sing and dance and make offerings to innumerable gods These celebrations help to maintain group unity and often induce euphoric feelings in the participants While there has always been an archetypal form to these group activities each local group develops its own version of myths rituals and celebrations The belief in spirits is the universal form The names number and idiosyncratic expressions of the spirits is the local content If you consider religious expressions around the world and throughout history you would notice that there a number of basic themes with thousands of imaginative variations You also notice that in every tribe village or city people believe they have special relationships with gods and spirits not enjoyed elsewhere No discussion of religion will make sense until the importance of group identity is understood Humans may sometimes look like individuals but the truth is that all humans are members of local groups that determine what they know how they communicate and how they treat other humans Each local group develops stories beliefs and rules Collections of local groups with special beliefs into larger organizations are often described as religion Members of local groups are described as religious if they recite group slogans attend meetings and celebrations Religions often claim special privileges for their members so that the term religious is used to claim advantages and superior moral authority where none actually exists The tendency for selective even exclusive group membership is deeply embedded in the human mind and shows up everywhere and at all times The key elements of group identity are recognizable appearance enhanced by costumes common language common beliefs and common behaviors especially ritualistic behaviors Download eBook in PDF format

World Religions for Healthcare Professionals Mark Carr, Siroj Sorajjakool, Ernest Burse, 2023-08-08 This third edition of a popular text introduces healthcare students and professionals to a wide range of health beliefs and practices in world

religions Chapters on various religions are written to offer an insider's view on the religion's historical development, key beliefs, and practices, including ideas of health, sickness, death, and dying. The chapters include case studies, advice on what to do and what to avoid when caring for patients. Introductory chapters invite the reader to consider the broad context of patient care in pluralistic society and explore one's personal orientation to others from different religions. How we care for patients from different backgrounds and cultures insists on professional boundaries that the reader may have not yet examined. A new chapter explores the relationship between religion and public health in light of the COVID-19 pandemic, asking the reader to consider what morally appropriate balance is required if and when personal faith conflicts with public health needs. Undoubtedly, the sensitivity with which clinicians communicate with patients and make decisions regarding appropriate medical intervention can be greatly increased by an understanding of religious and cultural diversity. This is a core textbook for students studying healthcare, religion, and culture and an invaluable reference for healthcare professionals.

America, 1909. The Jesuit review of faith and culture, Nov 13, 2017. **The Future of Our Liberties** Stephen C. Halpern, 1982-08-17. Vince Boudreau compares strategies of repression and protest in post-war Burma, Indonesia, and the Philippines because these alternative strategies shaped the social bases and opposition cultures available to dissidents and in turn influenced their effectiveness. He includes first-hand research as well as the social movements literature to consider the interactions between the regimes in the wake of repression and the subsequent emergence of democracy.
