A Father Losing His Daughter to Addiction Anthony M. Varone,2023-06-21 About the Book This story recounts the painful struggles of a daughter s addiction told through her father s eyes It takes the reader on a journey in living and dealing with her addiction This is a story similar to many addicts A Father Losing His Daughter to Addiction will hopefully not only help those struggling with addiction but also help to educate family members and give them hope and ways to cope during the struggle The author hopes the reader can really see the pain his daughter lived with as well as any addict and how this disease destroys lives and families About the Author Anthony M Varone explains My daughter meant everything to me and was my life I loved taking care of her the day she was born Life today is very difficult for me without her I always loved being active and riding my bike or playing golf as well as working out but today that is hard to enjoy because of how lost I find myself I m searching for my way back from her death By going to meetings with my daughter when she was alive and my meetings of Nar non it has opened my mind to see both sides that exist for the addict and their family It has educated me about her life as well as my life

and to heal challenging the boundaries of what psychologists traditionally consider support mechanisms or interventions for those in distress They develop a notion of healing that sees it as a process and an outcome that is rooted in the world view of those who live in the city Alongside the people s sense of insecurity is an equally strong sense of optimism care and a striving for change It is perhaps not surprising then that this book deals very centrally with themes of the struggle for progress mobility geographic material and spiritual and a sense of possibility and change associated with Johannesburg Ultimately the volume argues that coping and healing is both a collective and individual achievement as well as an economic psychological and material phenomenon Overall this volume challenges the notion that people can and should seek support primarily from professional medicalized psychological services and rather demonstrates how the particular support needed is shaped by an understanding of the cause of precarity
