more As Estreich shows each new application of biotechnology is accompanied by a persuasive story one that minimizes downsides and promises enormous benefits In this story people with disabilities are both invisible and essential a key promise of new technologies is that disability will be repaired or prevented In chapters that blend personal narrative and scholarship Estreich restores disability to our narratives of technology He also considers broader themes the place of people with disabilities in a world built for the able the echoes of eugenic history in the genomic present and the equation of intellect and human value Examining the stories we tell ourselves the fables already creating our futures Estreich argues that given biotech that can select and shape who we are we need to imagine as broadly as possible what it means to belong
