Becoming Spacefarers James A. Vedda,2012-06-21 What is a spacefaring society and how do we get there from here In addressing these questions this book examines how partisanship and parochialism have hindered American space dreams in recent years and demonstrates that the lessons we should have learned from U.S. history can put us on a more productive path Instead of being stuck in Stage One space development space as a training ground we can move more quickly to Stage Two Earth Moon space as an industrial park and eventually to Stage Three human activity across the solar system The keys to achieving this are routine proximity operations throughout Earth Moon space sustainable space infrastructure and a new level of collaboration between the public and private sectors not adventure trips to distant solar system destinations In *Becoming Spacefarers Rescuing America's Space Program* James A Vedda one of the most innovative space policy analysts working today offers a no nonsense account of the current doldrums of spaceflight in the United States and how the nation might deal with it He makes clear that we are in a crisis that business as usual will not enable us to overcome it and that it is not sufficient to rest on past successes or to accept the present partisanship and parochialism In addition to diagnosing the problems Vedda also offers useful and in some cases provocative prescriptions for how Americans might untie the Gordian knot of current approaches to spaceflight
