Alternative Loop Rings:

Alternative Loop Rings E.G. Goodaire, E. Jespers, C. Polcino Milies, 1996-10-24 For the past ten years alternative loop rings have intrigued mathematicians from a wide cross section of modern algebra As a consequence the theory of alternative loop rings has grown tremendously One of the main developments is the complete characterization of loops which have an alternative but not associative loop ring Furthermore there is a very close relationship between the algebraic structures of loop rings and of group rings over 2 groups Another major topic of research is the study of the unit loop of the integral loop ring Here the interaction between loop rings and group rings is of immense interest This is the first survey of the theory of alternative loop rings and related issues Due to the strong interaction between loop rings and certain group rings many results on group rings have been included some of which are published for the first time The authors often provide a new viewpoint and novel elementary proofs in cases where results are already known The authors assume only that the reader is familiar with basic ring theoretic and group theoretic concepts They present a work which is very much self contained It is thus a valuable reference to the student as well as the research mathematician An extensive bibliography of references which are either directly relevant to the text or which offer supplementary material of interest are also included

Alternative Loop Rings with Solvable Unit Loops Edgar G. Goodaire, Francisco César Polcino Milies, 1999 *Non Associative Algebraic Structures Using Finite Complex Numbers* W.B. Vasantha Kandasamy, Florentin Smarandache, 2012 The authors have used the concept of finite complex modulo integers to construct non associative algebraic structures like groupoids loops and quasi loops Using these structures we built non associative complex matrix groupoids and complex polynomial groupoids The authors suggest over 300 problems and some are at the research level
