of historical caboclo society **A Grammar of Tariana, from Northwest Amazonia** Aleksandra Iñáritia, 2003-08-07 This is a comprehensive reference grammar of Tariana an endangered Arawak language from a remote region in the northwest Amazonian jungle Its speakers traditionally marry someone speaking a different language and as a result most people are fluent in five or six languages Because of this rampant multilingualism Tariana combines a number of features inherited from the protolanguage with properties diffused from neighbouring but unrelated Tucanoan languages Typologically unusual features of the language include an array of classifiers independent of genders complex serial verbs case marking depending on the topicality of a noun and double marking of case and of number Tariana has obligatory evidentiality every sentence contains a special element indicating whether the information was seen heard or inferred by the speaker or whether the speaker acquired it from somebody else This grammar will be a valuable source book for linguists and others interested in natural languages Interactions Between Biosphere, Atmosphere and Human Land Use in the Amazon Basin Laszlo Nagy, Bruce R. Forsberg, Paulo Artaxo, 2016-11-09 This book offers a panorama of recent scientific achievements produced through the framework of the Large Scale Biosphere Atmosphere programme LBA and other research programmes in the Brazilian Amazon The content is highly interdisciplinary with an overarching aim to contribute to the understanding of the dynamic biophysical and societal socio economic structure and functioning of Amazonia as a regional entity and its regional and global climatic teleconnections The target readership includes advanced undergraduate and post graduate students and researchers seeking to untangle the gamut of interactions that the Amazon's complex biophysical and social system represent **Citizen's Guide to Sustainable Development**, 1990 **TV Guide**, 1987-10-02 **Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development** Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world economy It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia The author analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources **The Global Ecology Handbook** Global Tomorrow Coalition, 1990 A comprehensive easy to use and practical guide on the environment and the linkages among economic development energy policy population growth and other issues as well as
