## **California Dictatorship How Liberal Extremism Des:**

**California Dictatorship** Patrick Mallon, 2005 California Dictatorship How Liberal Extremism Destroyed Gray Davis tells the inside story of the people's revolt against an unresponsive and unpopular chief executive. It covers the period from the former governor's first term in 1999 to his removal from office in 2003. This is the story of the rebellion of a populace so incensed with having their political voice repeatedly undermined by leftist judges that they could no longer see straight. Because Davis personified the legislature's destructive policies, he served as the lightning rod for the voter's cumulative resentment and bitterness. Gray Davis is symptomatic of the nationwide vacuum of Democratic leadership. With nothing more to offer but increased taxes, social engineering on behalf of empowered victim classes, and a demoralizing negativity that renders party faithful some of the world's most soured ungrateful people, Democrats face a crossroads: either find the middle ground as reasonable people do and adapt their agenda to growing numbers of better informed voters of all demographics who want to protect what they have earned, or continue to attack the traditional family, excoriate American culture, strip morality from our value system, and debase conventional wisdom in the hopes of fooling half of the population who vote Democrat for no other reason than that they hate George Bush. The tragedy is that Mr. Davis could have one day become president. Governor's have that historical advantage. He had the resume: impeccable college credentials, served his country honorably in Vietnam while holding powerful positions in California government without drawing much criticism. He was moving up the ladder as they say. But then he was derailed by uncompromising liberalism, a simplistically seductive mindset that mandates a social revolution under the specious guise of tolerance and diversity while impugning legitimate opposition with personal and racial epithets to avoid comparative accountability. The unpopular management of central issues such as pro-gay legislation, the electricity crisis, illegal immigration, English-only instruction in schools, and deficit spending that drove the state to the brink of bankruptcy combined with arrogant tactics to destroy one man's promising career. These problems continue to fester in the Sacramento statehouse today, and as California goes, so goes the nation. Or as British writer George Orwell once said: Power is not a means; it is an end. One does not establish a dictatorship in order to safeguard a revolution; one makes the revolution in order to establish the dictatorship.

**Historical Abstracts** Eric H. Boehm, 1999 **Tracing the Discourses of Terrorism** O. Ditrych, 2014-04-22 This unique historical study explores how states have articulated statements about terrorism since the 1930s and what effect these discourses have had on global politics. Ditrych's analysis challenges established understandings of terrorism, providing a new conceptualization of how terrorism discourse emerged historically.

**The Oxford Handbook of European History, 1914-1945** Nicholas Doumanis, 2016-05-05 The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history. Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards, the era was dominated by political violence and chronic instability. Its symbols were Verdun, Guernica, and Auschwitz. By the end of this dark period

tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized. If the nineteenth century gave Europeans cause to regard the future with a sense of optimism, the early twentieth century had them anticipating the destruction of civilization. The fact that so many revolutions, regime changes, dictatorships, mass killings, and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis. The Oxford Handbook of European History 1914-1945 reconsiders the most significant features of this calamitous age from a transnational perspective. It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional, continental, and global developments. Readers will find innovative and stimulating chapters on various political, social, and economic subjects by some of the leading scholars working on modern European history today. Policing the Global South Danielle Watson, Sara N. Amin, Wendell C.

Wallace, Oluwabenga (Michael) Akinlabi, Juan Carlos Ruiz-Vásquez, 2022-11-11. Policing the Global South provides scholarship which further transnationalises and democratises ideas about policing practices and philosophies, highlighting renovations in approaches to policing studies and injecting innovative perspectives into the study of policing from scholars positioned on the periphery. Criminological knowledge depolarisation underscores a conscious effort by scholars from the Global South to increase intellectual knowledge focused on developing context-specific responses to issues not aligned to Northern ideological positions and specific to the non-Northern context. Such shifts draw attention to the expanse of spaces beyond Northern centres rife with challenges unlike any specific to those experienced or conceptualised by scholars from the Global North with an applied Northern criminological lens. Applying a postcolonial lens to empirical knowledge from country-specific cases in former colonies in Africa, Asia, the Caribbean, the Pacific, and Latin America, this book examines how policing issues not aligned to Northern ideological positions and specific to non-Northern contexts are addressed. The primary purpose is to share innovations in the field of policing, service provision, threats to security, crime responses, justice, and international trends developed in postcolonial developing country contexts. Given the aim of the book and the contributors' own research on issues of policing across the globe, it discusses themes including but not limited to the colonial legacies and their impact on policing, how plural regulatory systems and partnerships are navigated by the police, the linkages between access to justice, community perceptions, and police legitimacy, innovations and challenges in organisational reform, crime prevention, and community partnerships, and the expanding roles of police organisations in the Global South. While each chapter presents a policing issue in a country within a specific part of the Global South, the book highlights how important it is to frame responses based on contextual realities informed by an awareness of the past and present, with a goal of informing the future. Delivering a much-needed introduction to those specialising in policing in developing countries, this book is invaluable reading for academics and students of criminology, criminal justice, governance, policy, and IR, as well as professionals in policing organizations across the globe.
