language English abstract The perceptions of student teachers on Computer Assisted Language Learning CALL remain  
underexamined in literature This mixed methods study explored the perceptions of Modern Language ML student teachers to  
CALL at commencement and completion of Initial Teacher Education ITE in 2020 21 These student teachers were in seven  
institutions across England Scotland Wales and Northern Ireland It was found that student teachers were less positive about  
CALL usage at the end of their ITE programmes Self directed learning also overtook university education to become the  
primary channel of CALL knowledge acquisition for student teachers at ITE close A total of thirty factors were found to  
influence the CALL behaviours of student teachers The issue of workload was especially significant in follow up focus groups  
The CALL behaviours of student teachers also diverged from their initial expectations However these findings were not a one  
size fits all for the whole student teacher population There was evidence of local diversity between and within whole UK  
jurisdictions Student teachers collectively suggested twelve recommendations to enhance CALL instruction in Postgraduate  
Certificate in Education PGCE and Postgraduate Diploma in Education PGDE courses This investigation has produced a new  
and original theoretical framework that depicts the student teacher pathway to CALL adoption The Student Teacher CAL
