encounters exceptional These experiences are investigated through a re evaluation of established knowledge of the subject within the wider landscape of modern art practices in China The study draws on original archival and photographic material from different artistic genres and architecturally concentrates on China s engagement with the west through the treaty ports and leased territories the emergence of architecture as a profession in China and Japan s omnipresence not least in Manchuria which reached its apogee in the puppet state of Manchukuo The study s geographically temporally and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post colonialism to the Chinese situation By challenging conventional modernist historiography that has marginalised the experiences of the west s other for much of the last century this book proposes different ways of grappling with and comprehending the distinction and complexity of China s experiences and its encounter with architectural modernity
