Life After Divorce *A Reconstruction Project*

Nancy Folgr Wedemeyer

Divorce is one of the most stressful events anyone can experience. It brings changes to virtually all personal aspects of your life. It changes the ways you relate to your children and requires you to find different ways of taking care of your physical, social, emotional, intellectual, and spiritual needs. It means reorganizing the things that are going well and poorly in your life and reorganizing them so that more things go better. It means disrupting or losing much that is familiar and exploring new territories that sometimes are exciting, overwhelming, and frustrating. All of these conditions must be faced and dealt with in the midst of large social pressures. In addition to these personal issues, you will also be affected by inflation and less income, legal changes in your family, and new social expectations of how single parents should behave.

Life after divorce resembles rebuilding a house damaged by a earthquake. The velocity of some earthquakes is mild. While damage occurs, the basic structure remains intact. Rebuilding can begin immediately with few new materials needed. Life goes on somewhat normally.

However, the velocity of other earthquakes, like some divorces, is more wicked and rampant. Not much is left intact. Only the foundations and some walls or plumbing may be salvagable. There are memories of what the structure looked like and pictures to prove it. There is hope to rebuild life somewhat as it was but with improvements.
