**Pseudomonas Aeruginosa, Biology, Genetics, and Host-pathogen Interactions** Dara W. Frank, 2012-02-02 The opportunistic pathogen *Pseudomonas aeruginosa* offers a rich variety of biologically relevant topics to explore and serves as a model system to understand the interactions of Gram negative bacteria with human hosts The organism adapts readily to most environments It has a large and variable genome with a great deal of metabolic potential *P. aeruginosa* encodes a variety of regulatory systems to fine tune gene expression and integrate environmental signals This organism can infect both plants and animals and produces a plethora of enzymes and factors that can overcome host defenses Moreover it has the ability to change between the states of a sedentary colonizer to an invasive and highly motile organism Clinically the bacterium is resistant to many antibiotics making it difficult to treat and impossible to eradicate from the lungs of patients with cystic fibrosis Intrinsic antibiotic resistance combined with an armamentarium of tissue degradative enzymes makes it imperative to possess a comprehensive understanding of the biology genetics and pathogenesis of this organism so that novel therapeutics based on virulence product neutralization can be designed and implemented This Research Topics issue will be devoted to updating the current understanding of *P. aeruginosa* systems as they relate to its different lifestyles in different environments The underlying theme is to provide broad overviews and to integrate protein structure function and gene regulation as it relates to the biology of this bacterium

*Anthropology and Cryptozoology* Samantha Hurn, 2016-11-03 Cryptozoology is best understood as the study of animals which in the eyes of Western science are extinct unclassified or unrecognised In consequence and in part because of its selective methods and lack of epistemological rigour cryptozoology is often dismissed as a pseudo science However there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware scientific categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them In many cultural contexts myth folk classification and lived experience challenge the truth expounded by scientists With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world this volume engages with the theoretical and methodological issues raised by reported sightings of unrecognised animals Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures *Anthropology and Cryptozoology* Exploring encounters with mysterious creatures will be of interest to anthropologists sociologists and geographers working in the fields of research methods anthrozoology mythology and folklore and human animal interaction

**Legal Methods of Mainstreaming Climate Change Adaptation in Chinese Water Management** Xiangbai He, 2016-01-29 This book

addresses why whether and how the existing legal framework on water management in China could make climate change adaptation a mainstream issue The book uses a table to illustrate the distinctions and similarities between IWRM and water centered adaptation to analyze the possibilities of mainstreaming adaptation The new water planning processes and EIA are also illustrated in the form of figures showing the differences after factoring in adaptation considerations Interviews with water managers to obtain their perception and attitudes towards climate change adaptation offer new perspectives for readers The adaptation mainstreaming approach which finds a way to balance various interests and tasks will arouse the interests of those readers who argue that climate change is only one of the issues challenging water management and that poverty reduction environmental protection and living standard improvement are even more important Readers will also be interested to discover that the adaptation mainstreaming approach could be applied in water management institutions such as water planning and EIA In addition the book offers a clear explanation of the challenges of adaptation to the existing water related legal framework from a theoretical perspective and provides theoretical and practical recommendations
