The Psychology of Interrogations and Confessions Gisli H. Gudjonsson, 2003-05-27. This volume, a sequel to *The Psychology of Interrogations, Confessions and Testimony* which is widely acclaimed by both scientists and practitioners, brings the field completely up to date and focuses in particular on aspects of vulnerability, confabulation, and false confessions. It is an unrivalled integration of scientific knowledge of the psychological processes and research relating to interrogation with the practical investigative and legal issues that bear upon obtaining and using in court evidence from interrogations of suspects. Accessible style which will appeal to academics, students, and practitioners. Authoritative integration of theory, research, practical implications, and vivid case illustration. Coverage of topical issues like confabulation, false memory, and false confessions. Part of the Wiley Series in The Psychology of Crime, Policing and Law.

[Understanding Police Interrogation](#) William Douglas Woody, Krista D. Forrest, 2020-03-03. Uses techniques from psychological science and legal theory to explore police interrogation in the United States. *Understanding Police Interrogation* provides a single comprehensive source for understanding issues relating to police interrogation and confession. It sheds light on the range of factors that may influence the outcome of the interrogation of a suspect, which ones make it more likely that a person will confess, and which may also inadvertently lead to false confessions. There is a significant psychological component to police interrogations as interrogators may try to build rapport with the suspect or trick them into thinking there is evidence against them that does not exist. Also important is the extent to which the interrogator is convinced of the suspect's guilt, a factor that has clear ramifications for today's debates over treatment of black suspects and other people of color in the criminal justice system. The volume employs a totality of the circumstances approach, arguing that a number of integrated factors such as the characteristics of the suspect, the characteristics of the interrogators, interrogation techniques, and location, community perceptions of law enforcement, and expectations for jurors and judges all contribute to the nature of interrogations and the outcomes and perceptions of the criminal justice system. The authors argue that by drawing on this approach, we can better explain the likelihood of interrogation outcomes, including true and false confessions, and provide both scholars and practitioners with a greater understanding of best practices going forward.

[Interrogations, Confessions, and Entrapment](#) G. Daniel Lassiter, 2013-11-11. Coerced confessions have long been a staple of TV crime dramas and have also been the subject of recent news stories. The complexity of such situations, however, is rarely explored even in the scientific literature. Now in softcover, *Interrogations, Confessions and Entrapment* remains one of the best syntheses of the scientific, legal, and

ethical findings in this area uncovering subtle yet powerful forces that often compromise the integrity of the criminal justice system Editor G Daniel Lassiter identifies the exposure of psychological coercion as an emerging frontier in legal psychology citing its roots in the third degree approach of former times and noting that its techniques carry little scientific validity A team of psychologists criminologists and legal scholars asks and goes a long way toward answering important questions such as What forms of psychological coercion are involved in interrogation Are some people more susceptible to falsely confessing than others What are the effects of psychological manipulation on innocent suspects Are coercive tactics ever justified with minors Can jurors recognize psychological coercion and unreliable confessions Can entrapment techniques encourage people to commit crimes What steps can law enforcement take to minimize coercion Throughout this progressive volume readers will find important research based ideas for educating the courts changing policy and implementing reform from improving police interrogation skills to better methods of evaluating confession evidence For the expert witness legal consultant or student of forensic psychology this is material whose relevance will only increase with time

Warren D. Holmes, 2002-01-01 Author Holmes is well qualified to write a book on the subject of criminal interrogation and has lectured about it in many organizations including the FBI CIA the Secret Service the Canadian Police College and the Singapore Police Department He has also conducted polygraph examinations in such nationally known cases as the assassination of President John F Kennedy the murder of Dr Martin Luther King Jr and Watergate Drawing on current knowledge and his own extensive experience the author provides a thorough overview of the techniques and procedures of interrogation The main purpose of this book is that it will give you the tools to combat the criminal suspect and to attain the most satisfying outcome of criminal investigation obtaining a confession through astute interrogation Ideally to learn how to interrogate one should be exposed to talented interrogators in action Any book about criminal interrogation can never be a complete substitute for the daily or weekly experience of interrogating criminal suspects Recognizing this fact it is the author's plan to write a how to book that provides a framework for enhancing one's personal experience It will help guide the interrogator through the inherent difficulty that is manifested by the margin of error in perceiving guilt or innocence as well as in the length of time it takes an average person to become sufficiently experienced to reach an acceptable degree of proficiency The scope of this book includes a step by step procedure for interrogation from the moment the suspect enters the interrogation room to the time he leaves It will also help interrogators to keep from running out of things to say to a suspect by providing suggested interrogational arguments for specific crimes Sex crimes murder cases espionage cases and miscellaneous crimes are explored with various suggested arguments to be employed while handling these different types of cases The three types of closure the handling of the confession and the formal confession as court evidence are discussed in detail which also includes the interrogation of the accomplice and the potential witness By reading this book you will learn how to obtain confessions not by asking the suspect questions but by convincing a suspect to confess by using persuasive
