## **Creativity And Intelligence:**

**Creativity and Intelligence** Jacob W. Getzels, Phillip W. Jackson, 2011-03-10 Creativity is one of the most highly valued of human qualities It is also one of the most elusive to systematic inquiry Questions without end have been asked and re asked What is the nature of the creative process Can creative potential be identified before creative achievement What is the effect of family environment on creative development What is the relationship between creativity and personality Between creativity and intelligence We ourselves begin with the last question hoping that in the course of seeking an answer we shall throw light on the other issues The concept of intelligence and the consequent intelligence measure have been used to define individual differences in cognition as if the concept and the measure encompassed the totality of the human mind and imagination In school and more recently in other areas requiring intellectual accomplishment the IQ or some cognate of it has become the critical metric on which individuals are evaluated and sorted given preferment or denied it Individual differences in potential for productive thinking have been made synonymous with individual differences in performance on one or another of the numerous intelligence tests We began our studies with few preconceptions and few presuppositions We did not begin as is our more usual preference with an explicitly stated theoretical framework and a set of formal hypotheses Instead we permitted the behavior of the children and our own interests whatever their conceptual foundation to lead us from problem to problem and from question to question That this procedure enabled us sometimes to come upon fascinating new vistas in the behavior of children seemed worth the cost of being often lost in phenomena without relevant explicit concepts to guide our observations Modes of Thinking in Young Children Michael A. Wallach, Nathan Kogan, 1965

**Creativity and Intelligence** George Schlager Welsh, 1975 *Intelligence, Creativity, and Their Educational Implications* Joy Paul Guilford, 1968 **Expanding Visions of Creative Intelligence** Donald Ambrose, 2009 Provides a wide ranging exploration of theories research findings and philosophical perspectives that can expand thinking about the nature of creative intelligence and the purposes of education In an effort to expand and clarify the conceptual foundations for the fields of gifted education general education and creative studies the book provides synopses of 87 groundbreaking insights from 29 academic fields together with connections between these insights and creative intelligence *Intelligence, Creativity, and Wisdom* Robert J. Sternberg, James C. *Creative Intelligence in the 21st Century* Don Ambrose,Robert J. Sternberg,2016-07-15 How can creative individuals and societies adapt to complex 21st century conditions Will civilizations thrive or collapse in the decades to come if they are not creative enough or if they are too creative Interest in these questions is growing however until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity This book provides that understanding while yielding insights from many of the world s leading creativity researchers and educational experts The book begins with a big picture interdisciplinary overview of the socioeconomic cultural and technological pressures emerging from 21st century globalization and describes some ways in which those pressures simultaneously suppress distort and invigorate creativity in general and creative education in particular After that prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world The world s problems are complex messy and seemingly intractable but history tells us that human creativity finds solutions to even the most daunting problems This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today helping chart a path forward for creativity in the 21st century Jonathan Plucker Julian C Stanley Endowed Professor of Talent Development Johns Hopkins University A volume taking on macro opportunities and macroproblems by editors Ambrose and Sternberg is a treat for readers who want to think big and think forward Kick back for an imaginative journey that reaches back to early global insights but propels us solidly into the 21st century and beyond Ann Robinson Past President National Association for Gifted Children
