*Crime and Work* Jared Bernstein, Ellen Houston,2000 Greater labor market opportunities result in lower crime rates a clear link that is often ignored in policy debates on crime reduction This study examines the labor market characteristics of the offender ex offender population and the labor market conditions these potential workers face It identifies ex offenders as a distinctly disadvantaged subset of the low wage workforce they have little education weak job histories and weak labor market attachment plus the additional penalty of a criminal record Even at a time when the overall economy is growing workers in this sector face higher levels of un and underemployment This monograph argues fuller employment for ex inmates will need innovative labor market solutions including increases in the minimum wage more education and training and the expansion of work supports such as the Earned Income Tax Credit

*Work and Crime* Ann D. Witte, Helen Tauchen,1994 In this paper we explore the relationship between crime and work using data for a cohort sample of young men We find that working and going to school significantly decrease the probability of committing criminal acts and by virtually identical amounts Parochial school education and higher IQ are also significantly associated with lower criminal proclivities but a high school degree has no significant effect These findings in conjunction with other research suggest that participation in legitimate activities employment or school per se has a greater effect on criminal behavior than does the higher income associated with employment or educational attainment
