R., Thanigaivelan, M., Suchithra, S., Kaliappan, T., Mothilal, 2024-07-23 In the field of engineering optimization and decision
making have become pivotal concerns The ever increasing demand for data processing has given rise to issues such as
extended processing times and escalated memory utilization posing formidable obstacles across various engineering domains
Problems persist requiring not only solutions but advancements beyond existing best practices Creating and implementing
novel heuristic algorithms is a time intensive process yet the imperative to do so remains strong driven by the potential to
significantly lower computational costs even with marginal improvements This book titled Metaheuristics Algorithm and
Optimization of Engineering and Complex Systems is a beacon of innovation in this context It examines the critical need for
inventive algorithmic solutions exploring hyperheuristic approaches that offer solutions such as automating search spaces
through integrated heuristics Designed to cater to a broad audience this book is a valuable resource for both novice and
experienced dynamic optimization practitioners By addressing the spectrum of theory and practice as well as discrete versus
continuous dynamic optimization it becomes an indispensable reference in a captivating and emerging field With a deliberate
focus on inclusivity the book is poised to benefit anyone with an interest in staying abreast of the latest developments in
