Handbook of Modern Pharmaceutical Analysis Satinder Ahuja, Stephen Scypinski, 2001

This book describes the role modern pharmaceutical analysis plays in the development of new drugs. Detailed information is provided as to how the quality of drug products is assured from the point of discovery until the patient uses the drug. Coverage includes state of the art topics such as analytics for combinatorial chemistry and high throughput screening, formulation development, stability studies, international regulatory aspects and documentation and future technologies that are likely to impact the field. Emphasis is placed on current easy to follow methods that readers can apply in their laboratories.
