

« Tout savoir sur... les Normes, les Directives et le Marquage CE »

Compte tenu des responsabilités de plus en plus importantes des chefs d'entreprise, les normes sont souvent perçues comme une contrainte supplémentaire.

Pourtant, comprendre et interpréter les normes à caractère obligatoire ou volontaire, respecter la

réglementation qui s'applique aux produits fabriqués et à l'activité de l'entreprise, sont les meilleurs moyens pour le dirigeant d'entreprise de faire face à la pression des clients et de se protéger en cas de dommages et de litiges.

Les enjeux sont donc de taille !

Les NORMES

■ Qu'est-ce qu'une norme ?

C'est un document de référence sur un sujet donné : il fournit les règles, les caractéristiques s'appliquant à un produit, à une activité ou à son résultat.

Les principaux acteurs du marché ont ressenti le besoin de mettre en place ces « règles du jeu » pour faciliter les échanges (répondre aux exigences de sécurité, assurer la compatibilité des produits) et éviter un certain nombre de dérives (garantir la qualité des produits et des services mis sur le marché, assurer la transparence et la loyauté sur les marchés).

La norme est un document établi sur la base d'un consensus entre les différents acteurs d'un marché et approuvé par un organisme de normalisation reconnu. En Europe ces entités sont le CEN, le CENELEC et l'ETSI¹.

En règle générale, la norme est d'application volontaire. En France, seules 243 normes ont un caractère obligatoire sur un total d'environ 57 000 documents normatifs référencés par l'AFNOR².

■ À quoi servent les normes ?

- La norme est avant tout un outil d'échange et de développement économique que ce soit pour les produits ou les services. Elle est d'application volontaire (contrairement à la réglementation), elle s'utilise dans le cadre d'une stratégie d'entreprise : maîtrise d'un processus, contrôles systématiques, démarche écologique, transparence, sécurité optimale...

- Dans quelques cas (notamment dans les domaines liés à la sécurité et pour les conditions liées aux marchés publics), elle peut être rendue d'application obligatoire par les pouvoirs publics (textes réglementaires qui paraissent au Journal Officiel).

Par exemple...

- les collectivités locales et les donneurs d'ordres publics sont tenus d'appliquer les normes relatives aux marchés publics,
- les normes concernant la sécurité des machines, des jouets, la sécurité électrique sont obligatoires pour les fabricants concernés.
- De plus, les entreprises qui ont adopté une norme peuvent l'imposer à leurs sous-traitants. La norme devient alors un document de référence utilisé notamment dans le cadre du commerce international sur lequel s'appuie la plupart des contrats commerciaux « exigence du client ».

Exemple : être certifié ISO 9000 pour devenir sous-traitant d'EDF ou garantir un niveau d'application des normes qualité comme ISO 9000 pour être sous-traitant mécanique (équipementier automobile...).

- La norme peut être utilisée pour résoudre des litiges. C'est une base de travail pour déterminer les responsabilités en cas de procès, par exemple.

¹ CEN : Comité Européen de Normalisation, CENELEC : Comité Européen de Normalisation Electrotechnique, ETSI : European Telecommunications Standards Institute

² AFNOR : Association Française de Normalisation

Directives Concep Normes

Arturo Cuomo
