Collective Memory as Currency Tracy Adams, 2024-07-01 Why is the past so dominant in the present This book conceptualizes collective memory as currency a medium of exchange a system in common use and one that is traded between and within nations Bringing together contemporary case studies and multidisciplinary scholarship this volume shows how past events are used and perceived as a commodity and a substantially fungible marketable item produced to satisfy wants or needs their supply or demand being a part of one universal market This book provides readers with a broader understanding of the power of the past in the present Specific past events are incarnated into collective memories that can transform into iconic almost mythical stories that can be employed to help make sense of the present Through evoking constructing and reconstructing selectively highlighting certain aspects or perspectives of prominent past events these collective memories become a significant resource that actors and publics turn to in times of need As currency these memories provide a service As currency they can also relatively easily travel between collectives since it is commonly understood that the past has value in the present and that this value is similarly utilized in various countries around the world

Dealing with Disasters from Early Modern to Modern Times Hanneke Asperen, Lotte Jensen, 2025-10-01 Disasters are as much cultural as natural phenomena For centuries news about catastrophic events has been disseminated through media such as chronicles pamphlets newspapers poems drawings and prints Nowadays we are overwhelmed with news about the cataclysmic effects of recent forest fires floods and storms Due to the ongoing climate crisis extreme weather events will likely have ever greater impacts on our lives This volume addresses cultural representations of catastrophes such as floods epidemics and earthquakes over the centuries In the past as now artists and authors try to make sense of disasters grasp their impact and communicate moral religious or political messages These creations reflect and shape how people learn and think about disasters that occur nearby or far away both in time and space The parallels between past and present underline how this book contributes to modern debates about cultural and creative strategies in response to disasters

Myth and Memory in the Construction of Community Bo Stråth, 2000 Across and beyond Europe history is being rewritten in the wake of the Cold War s dissolution An example of this process is the re

evaluation of the part played by resistance movements during World War II in country after country This book deals with the role of myth and memory in the formation of collective identities with a particular emphasis on national identities Myth and memory should not be seen as clearly demarcated from history They are history in ceaseless transformation and reconstruction the image of the past is continuously reconsidered and reconstituted in the light of an everchanging present History is an interpretation of the past not the past as it really was The key question of this book concerns the role myth and memory play in the construction of communities and what the distinction between collective myth and memory signifies The discussion of this question is undertaken in theoretically oriented chapters as well as 15 case studies of national patterns from Scandinavia in the north to Italy and Israel in the south and from the USA in the west to Russia in the east as well as local community constructions in working class districts in Glasgow and Roubaix and the national politics of architecture in Berlin and Rome This book appears within the framework of a research project on the cultural construction of community in modernisation processes in comparison This project is a joint enterprise of the European University Institute in Florence and the Humboldt University in Berlin sponsored by the Bank of Sweden Tercentenary Fund Disaster and the Dynamics of Memory Pawas Bisht,2013 **Memory of the World at Risk** ,1996 Preservation constitutes the chief business of archives yet they are as seriously threatened with destruction as other library collections From environmental factors such as termites or air pollution to political situations such as war to natural catastrophes such as fire or earthquake the causes are many Reporting on the extent of the loss among 6 250 archives in 105 countries worldwide Joan van Albada reviews the contributing factors and counteractive measures used alarm systems microfilming changes in the storage air conditioning and more Complementing this overview are articles on specific situations and their solutions including the reconstruction of the archives in 15th century Constantinople the peculiarities of the Senegal archival system and the recent situation in Bosnia Herzegovina French and English abstracts summarize the content of each article *McClure's Magazine* ,1913 *Putnam's Complete Book of Quotations, Proverbs and Household Words* ,1929 *EDN* ,1975 **Rhetoric and Public Memory in the Science of Disaster** Jeremy R. Grossman,2024 Rhetoric and Public Memory in the Science of Disaster grapples with the role of science in the public memory of natural disasters Taking a psychoanalytic and genealogical approach to the rhetoric of disaster science throughout the twentieth century this book explores how we remember natural disasters by analyzing how we try to prevent them Chapters track the development of predictive modeling methods alongside some of the worst and most consequential natural disasters in the history of the United States From miniaturized physical scale models to cartographic renderings within a burgeoning statistical science to ever more complex simulation scenarios disaster science has long created imaginary versions of horrific events in the effort to prevent them Through an exploration of these hypothetical disasters this book theorizes how science itself becomes a site of public memory an increasingly important question in a world of changing weather *Memory Selections, Their Value and Importance, Improvements*
