When multiple forces act on an object, they can combine to cause an object to accelerate, decelerate, or change direction. Understanding how forces and acceleration are related is a key concept in physics. This passage explains how forces and acceleration are related.</p> <p>Newton's second law of motion states that the acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. This means that if the net force on an object increases, the acceleration will also increase, and if the mass of the object increases, the acceleration will decrease.</p> <p>Forces can also be described in terms of their direction. A force that acts in the same direction as an object's motion will cause it to accelerate, while a force that acts in the opposite direction will cause it to decelerate.</p> <p>Forces can also be described in terms of their point of application. A force that acts on the center of mass of an object will cause it to accelerate, while a force that acts on a point other than the center of mass will cause it to rotate.</p> <p>Understanding how forces and acceleration are related is a key concept in physics. This passage explains how forces and acceleration are related.</p> </div> <p>Answer the questions that follow.</p> <ol style="list-style-type: none"> <li>Which of the following is not a type of contact force?             <ol style="list-style-type: none"> <li>Friction</li> <li>Spring</li> <li>Gravity</li> <li>Normal</li> </ol> </li> <li>Which of the following is not a type of contact force?             <ol style="list-style-type: none"> <li>Friction</li> <li>Spring</li> <li>Gravity</li> <li>Normal</li> </ol> </li> <li>Which of the following is not a type of contact force?             <ol style="list-style-type: none"> <li>Friction</li> <li>Spring</li> <li>Gravity</li> <li>Normal</li> </ol> </li> <li>Which of the following is not a type of contact force?             <ol style="list-style-type: none"> <li>Friction</li> <li>Spring</li> <li>Gravity</li> <li>Normal</li> </ol> </li> </ol> <div style="text-align: right;">  </div>
