Disability Voice:

Disability Voice Mal Leicester, 1999 Leicester operates on the KISS principle Keep It Simple Stupid Her thoughts are so clearly and concisely packaged that her thoughts for an enabling education read like an 11th commandment The simpler thing are the more obvious sometimes the more profoundly they affect us For instance it is an absurdly commonsensical notion that one might ask the people who use a service whether they are satisfied with it or not That is precisely what Leicester did interviewing eighteen adults with disabilities and ten parents of disabled children who are in the education system currently While the size of her research sample like the book in which she interprets the findings is small she is able to weave from recurrent narratives of the school experience a message that must be heard by educators and policy makers Disability voice is a small but hugely important book absolutely powerful in its brevity highly readable for nonacademics and slim enough to appeal to busy teachers principals and college faculty In just over 100 pages then Leicester summarizes several disability theories relates them to the education system and proposes radical change Next she recommends many incremental improvements in which a whole school policy of inclusion might focus increased resources curriculum differentiation assessments of social adjustment as well as academic achievement better information and support systems involving parents as partners in assessment and decision making in service training for teachers and staff and external help for parents developing advocacy skills Clear straight forward doable suggestions Keep It Simple Leicester makes her point swiftly in brief with neither wasted words nor skimpy evidence Inclusion benefits all lets hope that Leicester's slim book inspires heavyweight changes in schools and colleges everywhere Disability Studies Quarterly Mal Leicester's book Disability Voice which highlights the experience of disabled children and adults in the education system is a timely and important contribution to the moral imperative set out by the debates on inclusion I found the book clear direct and well argued The structure allows the reader to follow the themes of the stories but also to dip in and out as required It is a book that anyone interested in developing education policy that includes the experience of different peoples will find invaluable and challenging Journal of Moral Education Her own experiences as the parent of a severely disabled daughter were motivational in writing this book and were a significant factor in her decision to approach the issue of education through the direct experience of disabled people themselves What follows is a wide ranging and authoritative book based on interviews with 30 adults with a variety of disabilities Each is thoroughly analysed by the author Disability Voice addresses the rights of those with disabilities and the needs of their carers The book will be of particular interest and benefit to educational policy makers teachers their trainers and people with disabilities and their families Disability Times The best method of including disabled people in mainstream education is the subject of much debate but the voice of disabled people themselves is seldom heard Mal Leicester argues that people have been disabled by society and that there is a need for educational change The book encourages equal opportunities for disabled people by promoting the practice of enabling education a disability aware

education that caters for everyone's educational needs Interviews with disabled people are also included giving their own recommendations for educators and policy makers Disability Voice addresses the rights of those with disabilities and the needs of their carers and will be of interest to educational policy makers teachers their trainers and people with disabilities and their families

Flipping the Story on Disability and

Violence Patsie Frawley, Nancy Fitzsimons, 2025-09-30 Internationally there is a growing awareness that domestic family and sexual violence is a social issue that results from social structures and relational contexts that have positioned women as less than men. Alongside this growing awareness has come social action by women and their allies that aim to change these social and relational structures using an intersectional framing of oppression. People with disabilities especially people with an intellectual disability have been largely excluded from this social action. However for decades they have been challenging the oppressive social and relational structures that frame them as of less value than non disabled people. Aligned with this self advocacy are social ecological models that look systemically to understand why interpersonal violence occurs and to prevent violence. This book introduces a unique flipped social ecological model and applies it to approaches from across the world that are working from the societal community relationship and individual levels to challenge the vulnerable victim discourse through positioning people with intellectual and other disabilities as social change agents shaping their safer lives. Divided into six chapters and providing case examples from Australia the United States New Zealand the United Kingdom Norway Sweden and the Global South this book profiles work done by government and community based anti violence service sectors in partnership with people with intellectual disability and their allies as well as work on sexuality rights and disability advocacy that is contributing to the social effort to prevent interpersonal violence against people with an intellectual disability. It is a must read resource for anyone doing interpersonal violence prevention research and work and can be used as primary or supplemental reading for students doing coursework and research in disability studies gender studies community psychology sociology public health and social work.
