International Conference on Novel Intelligent Digital Systems NiDS 2024 which took place in Athens Greece on September 25-27, 2024, hosted by the University of West Attica. NiDS 2024 was conducted in a hybrid format offering participants the flexibility to join either online or in person. The conference highlighted the latest innovations in intelligent systems and emphasized the collaborative research that advances Artificial Intelligence (AI) in software development. It served as a platform for high quality research providing a space to explore challenges and innovations in AI. NiDS 2024 referred to experts, researchers and scholars in artificial and computational intelligence as well as the broader field of computer science offering insights into interconnected and complementary areas. By promoting the exchange of ideas, the conference aimed to strengthen and expand the network of researchers, academics and industry professionals.

Generative Systems and Intelligent Tutoring Systems Sabine Graf, Angelos Markos, 2025-07-28. This book constitutes the refereed proceedings of the 21st International Conference on Intelligent Tutoring Systems (ITS 2025) held in Alexandroupolis, Greece, during June 2-6, 2025. The 21 full papers, 27 short papers and 5 posters included in this book were carefully reviewed and selected from 67 submissions. The papers are organized in the following topical conference tracks: Part I: Generative Tutoring Systems. The goal of this part is to show how new techniques inspired by artificial intelligence (AI) and new methods in education can improve learning, teaching and generate the capacity for knowledge acquisition and much more. Part II: Application areas, environments and techniques for AI systems. This part shows the progress of research investigating the different application areas such as education, health, techniques such as neural networks, data mining, natural language processing and environments such as games, virtual reality, cognitive robots for effective AI systems.

People and Computers X M. A. R. Kirby, A. J. Dix, J. E. Finlay, 1995-10-12. Human Computer Interaction (HCI) is concerned with every aspect of the relationship between computers and people, individuals, groups and society. The annual meeting of the British Computer Society's HCI group is recognized as one of the main venues for discussing recent trends and issues. This volume contains refereed papers and reports from the 1995 meeting. The materials cover a broad range of HCI related topics including visualization, computer supported communication, task analysis, formal methods, user support and cyberspace. The documents consider both research and commercial perspectives, making the book essential for all researchers, designers and manufacturers who need to keep abreast of developments in HCI.

Handbook of Standards and Guidelines in Human Factors and Ergonomics Waldemar Karwowski, Anna Szopa, Marcelo M. Soares, 2021-06-28. With an updated edition including new material in additional chapters, this one-of-a-kind handbook covers not only current standardization efforts but also anthropometry and optimal working postures, ergonomic human computer interactions, legal protection, occupational health and safety and military human factor principles. While delineating the crucial role that standards and guidelines play in facilitating the design of advantageous working conditions to enhance individual performance, the handbook suggests ways to expand opportunities for global economic and ergonomic development. This book features Guidance on the design of work systems.

including tasks equipment and workspaces as well as the work environment in relation to human capacities and limitations
Emphasis on important human factors and ergonomic standards that can be utilized to improve product and process to
ensure efficiency and safety A focus on quality control to ensure that standards are met throughout the worldwide market

Philosophy of Technology Pieter E. Vermaas,2011 In A Philosophy of Technology From Technical Artefacts to
Sociotechnical Systems technology is analysed from a series of different perspectives The analysis starts by focussing on the
most tangible products of technology called technical artefacts and then builds step wise towards considering those artefacts
within their context of use and ultimately as embedded in encompassing sociotechnical systems that also include humans as
operators and social rules like legislation Philosophical characterisations are given of technical artefacts their context of use
and of sociotechnical systems Analyses are presented of how technical artefacts are designed in engineering and what types
of technological knowledge is involved in engineering And the issue is considered how engineers and others can or cannot
influence the development of technology These characterisations are complemented by ethical analyses of the moral status of
technical artefacts and the possibilities and impossibilities for engineers to influence this status when designing artefacts and
the sociotechnical systems in which artefacts are embedded The running example in the book is aviation where aeroplanes
are examples of technical artefacts and the world aviation system is an example of a sociotechnical system Issues related to
the design of quiet aeroplane engines and the causes of aviation accidents are analysed for illustrating the moral status of
designing and the role of engineers therein Table of Contents Technical Artefacts Technical Designing Ethics and Designing
Technological Knowledge Sociotechnical Systems The Role of Social Factors in Technological Development Ethics and
Unintended Consequences of Technology
