Bulletin of the Art Institute

of Chicago Art Institute of Chicago,1916 Play and Creativity in Art Teaching George Szekely,2015-03-02 In Play and Creativity in Art Teaching esteemed art educator George Szekely draws on his two classic volumes Encouraging Creativity in Art Lessons and From Play to Art to create a new book for new times The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art By observing children at play and using props and situations familiar to them teachers can build on children s energy and self initiated discoveries to inspire school art that comes from the child s imagination The foundation of this teaching approach is the belief that the essential goal of art teaching is to inspire children to behave like artists that art comes from within themselves and not from the art teacher Play and Creativity in Art Teaching offers plans for the study of children s play and for discovering creative art teaching as a way to bring play into the art room While it does not offer a teaching formula or a single set of techniques to be followed it demystifies art and shows how teachers can help children find art in familiar and ordinary places accessible to everyone This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children A Guide to Teaching Art at the College Level Stacey Salazar,2021 This accessible guide will help studio art and design professors meaningfully and effectively transform their curriculum and pedagogy so that it is relevant to today s learners Situating contemporary college teaching within a historic art and design continuum the author provides a practical framework for considering complex interactions within art and design pedagogy Readers will gain a deeper appreciation of college students and their learning an understanding of teaching repertoires and insight into the local and global contexts that impact teaching and learning and how these are interrelated with studio content Throughout Salazar expertly weaves research theory and helpful advice that instructors can use to enact a mode of teaching that is responsive to their unique environment The text examines a variety of educational practices including reflection critique exploration research student to student interaction online teaching intercultural learning and community engaged curricula Book Features A clear introduction to research and theory in college learning and art education A response to the current shift from studio practice to an investment in teaching practice Reflective prompts actions teaching strategies and recommended resources User friendly templates ready to customize for the reader s own content The Art of Teaching Art George E.
