and identifies effective models for using design in classrooms The research tapped three primary sources of data 1 a review of the literature 2 a national qualitative survey of teachers and 3 site visits to 10 schools Also the researchers conducted qualitative interviews with principals curriculum coordinators other school or district administrators teachers teachers aides students and parents The six chapters include 1 Learning Through Design 2 Lifelong Learning 3 A Strategy for Excellent Teaching 4 Design in the Curriculum 5 Opportunities and Challenges for Schools and 6 Conclusions and Recommendations Three appendices a bibliography and information about the authors the National Endowment for the Arts and the Association for Supervision and Curriculum Development conclude the document EH *Should Psychology Be a Science?* Jock Abra,1998-03-30 The past century has seen many changes in the study of psychology One of those major changes was the adoption of scientific principles to define and build the discipline of psychology These principles were manifested in the discipline s method of investigation and subject matter For many this constituted a revolution in the study of psychology This work examines the results of this revolution and asks whether it has been beneficial The author explains how the psychology science union came about and examines the positive and negative results He then describes the major characteristics of science empiricism generalization hypotheses theories and models analysis reductionism and determinism explaining how each principle was utilized in regard to psychology Dr Abra also includes information on psychology s most eminent authorities who have fundamentally influenced its directions [Assaulting Parnassus](#) Jock Abra,1988-08-30 To find more information about Rowman and Littlefield titles please visit [www rowmanlittlefield com](http://www.rowmanlittlefield.com) **Images of Imagination** Mary Josephine Reichling,1991 **Doing History** Linda S. Levstik,Keith C. Barton,1997 Imagine a group of primary students debating whether Christopher Columbus should be considered a hero or eighth graders producing a video to examine whether a historic document the Bill of Rights speaks to current issues Imagine classrooms where students regularly and actively do history frame questions gather data from primary and secondary sources organize and interpret that data and share their work with different audiences Imagine too a history curriculum that reflects the rich diversity of people in the United States and around the world The authors have spent a number of years working with teachers in just such classrooms They have seen powerful historical study in classes where many of the children were recent immigrants as well as in classes where children s families have lived in the same area for nearly two hundred years Some classes are full inclusion programs where the special education and regular teachers team teach most include students with special needs at least for social studies The classrooms range from urban and suburban to rural settings But despite their differences these communities of inquiry have several things in common In each one even the youngest children describe historical study as interesting and important Moreover historical study in each of these classrooms deals with important historical content and engages students in authentic historical inquiry All students are invited to be historical participants Throughout the book the authors draw on these classrooms to provide models of instructionally sound thoughtful and thought provoking history teaching with

students from a wide variety of backgrounds Most chapters also begin with a vignette from one of these classrooms These vignettes serve as snapshots of history in action including some of the obstacles even good teachers face Each is a glimpse of a particular experience of teaching and learning history The chapters put each vignette in perspective explaining why it is sound instruction and sound history and providing examples of activities ranging from the first years of primary school through the end of the middle grades In structuring the book this way the authors suggest a framework for rethinking history instruction at the elementary and middle school levels Their goal is to stimulate readers thinking relative to applying the ideas presented here to their own classrooms and students Philosophy of Music Education Review ,1999
