An Exploration of the Ways in which Art Therapy Complements and Enhances Cognitive-behavior Therapies in the Rehabilitation of Violent Offenders Sarah Lyn Little, 2007 Violent crime is a serious problem in North America Most violent offenders have been victims of violence themselves predisposing them to inflict harm upon others The mental health needs of these individuals are immense helping them restore a sense of humanity and decrease their likelihood of recidivism is a challenging and important goal As such rehabilitation programs for this population must be carefully considered The effectiveness of cognitive behavior therapies CBT is well established within prisons Although it is a less established approach within corrections art therapy has also been shown as an effective intervention in the rehabilitation of violent offenders There are art therapists who integrate CBT approaches in their practice however these two therapeutic treatment models have traditionally been perceived as somewhat antithetical This research seeks to explore the links between these approaches illustrating the ways in which art therapy facilitates and enhances the goals of CBT The aim of this study is to contribute to an awareness regarding the importance of offering the most effective balanced and rich treatment possible to violent offenders in order to prevent violent behavior

Art Therapy with Offenders: A Special Focus on Male Sex Offender Treatment Courtney J Brensing, 2020 Art Therapy with Mentally Ill Offenders Serving Long-term Sentences Christina Palaschak, 2004

Using Art Therapy with Aboriginal Offenders Diane Gattermann, 1999 There is a sharp contrast between the Euro American and Aboriginal American conceptualisations of criminality and its consequent treatment While the Euro American paradigm views criminality as a pathology of the individual First Nations peoples view it as a spiritual emotional mental and physical imbalance that stems from and ultimately has repercussions for outside sources Because of its holistic approach emphasis on non verbal symbolism and non threatening use of art as a therapeutic milieu art therapy proves to be an efficacious transcultural tool in the treatment of adult offenders at a correctional institution for Aboriginal men Review and discussion of Euro American and Aboriginal views of criminality and treatment is followed by a brief discussion of the historic and political context in which First Nations peoples are situated and which must be understood in order to fully grasp the basis for the contemporary social emotional and psychological conditions of Aboriginal individuals This is followed by two case studies which exemplify the use of art therapy in this context

Providing Group-based Art Therapy for Adult Male Sex Offenders Olivia Darcus Shumate, 2012

Art therapy groups designed to evoke empathy were established in a large psychiatric hospital for civilly committed adult male sex offenders. A review of related literature describes some different therapeutic theories used when working with this population. Two members of the groups are discussed in detail in the context of an in depth group study. Descriptions of sessions are followed by discussion about art done by the art therapy intern in response to working with clients in this setting. Making responsive art enabled the art therapy intern to monitor her own reactions in order to maintain a beneficial and therapeutic relationship. Reproductions of client and intern's artwork are included.

Artbibliographies Modern, 2004

The Person in Art Hans-Otto Thomashoff, Ekaterina Sukhanova, 2008

Through an interdisciplinary multicultural approach this book explores the role of psychiatric art in facilitating personal empowerment, fostering the healing process and confronting stigma. Today when we are constantly reminded of the dangers of thinking in exclusive terms, art affords us a model of dialogue in which the other is accepted as an equal conversation partner. Art fosters cooperative communication in which dignity and individuality of a mental health patient may be reaffirmed. At the same time, art allows for critical distance, retrospection and vast opportunities for individual choice and thus may be conducive to an improved self image and self esteem. The book discusses norm and its transgression as aesthetic categories influencing the understanding of outsider and mainstream art. The role of art as a social force that contributes to the way mental health and illness are perceived in a given community is also addressed. Understanding the mechanisms underlying aesthetic perceptions of art helps us understand how psychiatric art can be used to help fight stigma associated with illness. Special attention is given to the semiotics of the portrait, a genre with an especially marked dialogical potential that still lacks a systematic study in the context of psychiatric art. The book is addressed to psychiatrists, other mental health professionals as well as scholars in humanities and social sciences concerned with the issues of creativity and the mind.
