The Gospel of Leadership Ryan Krupa, 2018-09-21 This book is an odyssey into the truth of leadership's nature and essence. Written for aspiring leaders, teachers of leaders and followers, the aim is to practice awakening a leader's potential. The book mirrors and reflects the inner nature of the leadership journey. It is written in a contemplative style and uses dialogue to exercise a leader's will, intelligence, and spirit. The techniques taught in these chapters are dialogue, meditation, and contemplation. The author seeks to teach leaders how to exercise the power of will and the power of intelligence to make the kinetic chain of knowing, willing, and acting morally and intellectually strong. Reading this book serves as a leadership development exercise. This book is a teaching tool designed to demystify what takes place in the interior nature of a leader. It examines a leader's soul as it is exercised and strengthened in preparation for the cardinal act of leading, and it analyzes the act of making practical judgments, an act that demands the cultivation of a discerning mind to see and know the truth to be acted upon. Based on a true story, these chapters are a reflection on the formation of a leader and a realization of twenty years of research. The author studies the question: What does it take to develop a leader? Deliberations on eight years of guiding leaders on moral and intellectual quests in search of true freedom are revealed.

Subsidizing Culture James T. Bennett, 2016-02-12 In the American mind, state subsidization of writers and artists was long associated with monarchies and in later years socialist states. The support these regimes gave to intellectuals was understood to come with a cost, yet beginning with the New Deal's Federal Writers Art and Theater Projects, a new policy consensus asserted that by offering financial support to the arts, the federal government was affirming their importance to the nation. *Subsidizing Culture* examines the development of and controversies surrounding federal programs that directly benefit writers, artists, and intellectuals. James T. Bennett examines four cases of such support: the New Deal's Federal Writers Art and Theater Projects, the vigorous promotion in the post-World War II and early Cold War eras of abstract expressionism and other forms of modern art by the US government, the National Endowment for the Arts (NEA), which has fortified its position as the preeminent arts bureaucracy, and the National Endowment for the Humanities, the NEA's less embattled twin, which funnels monies to scholars. Bennett concentrates on the creation of and the debate over these government programs, and he gives special attention to the critics who are usually ignored. He reminds us that the chorus of anti-subsidy voices over the years has included such disparate figures as writers William Faulkner and John Updike, artists John Sloan and Wheeler Williams, and social critics Jacques Barzun and H. L. Mencken.
